

Master of

Computer Science

**SRI VIDYA MANDIR ARTS & SCIENCE COLLEGE**

**(Autonomous)**

[An Autonomous College Affiliated to Periyar University, Salem, Tamil Nadu]

[Accredited by NAAC with 'A' Grade with CGPA of 3.27]

[Recognized 2(f) & 12(B) Status under UGC Act of 1956]

Katteri – 636 902, Uthangarai (Tk), Krishnagiri (Dt)

Tamil Nadu, India

**DEGREE OF MASTER OF SCIENCE IN COMPUTER SCIENCE**

**CHOICE BASED CREDIT SYSTEM (CBCS)**

**REGULATIONS AND SYLLABUS FOR**

**M.Sc. COMPUTER SCIENCE PROGRAMME**

**(SEMESTER PATTERN)**

**(For Students Admitted in the College from the Academic Year 2020-2021 Onwards)**

### Programme Outcomes (POs)

|            |  |
|------------|--|
| <b>PO1</b> | Understand the advanced concepts of key areas in Computer Science and enable students to expose technical, analytical and creative skills.         |
| <b>PO2</b> | Understanding and applying knowledge of mathematics, science, algorithmic and computing skills to acquire solution of complex scientific problems. |
| <b>PO3</b> | Build the student's effective communication, ethical attitudes, team work and logical proficiency.   |
| <b>PO4</b> | Students are to be imparted with a broad conceptual background in the Computing sciences to design, implement and evaluate a computational system. |
| <b>PO5</b> | Make use of modern IT tools and techniques to develop practical skills for fulfilling the needs of industry and society.                           |
| <b>PO6</b> | Develop research oriented skills to identify, analyse and synthesize scholarly literature relating to the field of Computer Science.               |

### Programme Specific Outcomes (PSOs)

|             |   |
|-------------|---|
| <b>PSO1</b> | Posses the knowledge in the field of Computer Science through theory and practicals.                          |
| <b>PSO2</b> | Students will demonstrate high-level expertise in computer Science research and in the synthesis of research. |
| <b>PSO3</b> | Communicate computer science concepts, designs, and solutions effectively and professionally.                 |
| <b>PSO4</b> | Use software development tools, software systems, and modern computing platforms.                             |
| <b>PSO5</b> | Design, correctly implement and document solutions to significant computational problems.                     |

## SRI VIDYA MANDIR ARTS & SCIENCE COLLEGE

(Autonomous)

Master of Science (M.Sc.) in Computer Science

Programme Pattern and Syllabus (CBCS)

(For Students Admitted in the College from the Academic Year 2020-2021 Onwards)

## Major Electives

### Elective Course – I

| Semester | Paper | Course Code | Name of the Course                 |
|----------|-------|-------------|------------------------------------|
| I        | I     | 20PCS1E01   | Software Project Management        |
|          | II    | 20PCS1E02   | Wireless Networks                  |
|          | III   | 20PCS1E03   | Object Oriented System Development |

### Elective Course – II

| Semester | Paper | Course Code | Name of the Course          |
|----------|-------|-------------|-----------------------------|
| II       | I     | 20PCS2E04   | Data Mining and Warehousing |
|          | II    | 20PCS2E05   | Compiler Design             |
|          | III   | 20PCS2E06   | Embedded Systems            |

### Elective Course – III

| Semester | Paper | Course Code | Name of the Course    |
|----------|-------|-------------|-----------------------|
| III      | I     | 20PCS3E07   | Bio-informatics       |
|          | II    | 20PCS3E08   | Theory of Computation |
|          | III   | 20PCS3E09   | Cloud Computing       |

### Elective Course – IV

| Semester | Paper | Course Code | Name of the Course                 |
|----------|-------|-------------|------------------------------------|
| IV       | I     | 20PCS4E10   | Mobile Computing                   |
|          | II    | 20PCS4E11   | Soft Computing                     |
|          | III   | 20PCS4E12   | Principles of Information Security |

### Elective Course – V

| Semester | Paper | Course Code | Name of the Course      |
|----------|-------|-------------|-------------------------|
| IV       | I     | 20PCS4E13   | Social Network Analysis |
|          | II    | 20PCS4E14   | Professional Ethics     |
|          | III   | 20PCS4E15   | Block Chain Technology  |

**EDC-EXTRA DISCIPLINARY COURSE**

Students are expected to opt EDC (Non major elective) offered by other departments.

| <b>Semester</b> | <b>Course Code</b> | <b>Name of the Course</b>                    |
|-----------------|--------------------|--|
| II              | 20PCS2ED01         | Principles of Information Technology         |
|                 | 20PCS2ED02         | Fundamentals of Computers and Communications |
|                 | 20PCS2ED03         | E-Commerce                                   |

# PROGRAMME SYLLABUS

|--------------------------------|-----------------|------------------------|--------------|---|
| Core – I                       |                 | Course Code: 20PCS1C01 |              | Course Title: Design and Analysis of Algorithms |
| Semester<br>I                  | Hours/Week<br>4 | Total Hours<br>60      | Credits<br>4 | Total Marks<br>100                              |

### Course Objectives

1. Understand and Apply an algorithms and design techniques to solve problems.
2. Analyze the complexities of various problems in different domains.
3. Analyze the algorithmic performance of various algorithms to determine the computational complexity of algorithms.

#### UNIT – I

**Introduction:** Notion of Algorithm – Fundamentals of Algorithmic Problem Solving – Important Problem Types – Fundamentals of the Analysis of Algorithm Efficiency – Analysis Frame Work – Asymptotic Notations and Basic Efficiency Classes – Mathematical Analysis of Non-recursive Algorithms – Non-recursive Solution to the Matrix Multiplication – Mathematical Analysis of Recursive Algorithms – Recursive Solution to the Tower of Hanoi Puzzle.

#### UNIT – II

**Divide and Conquer:** Merge sort – Quick sort – Binary Search – Binary Tree Traversals – Multiplication of Large Integers – Strassen’s Matrix Multiplication – Closest Pair and Convex Hull Problems – **Greedy Technique:** Prim’s Algorithm – Kruskal’s Algorithm – Dijkstra’s Algorithm.

#### UNIT – III

**Dynamic Programming:** Computing a Binomial Coefficient – Warshall’s and Floyd’s Algorithms – Warshall’s Algorithm – Floyd’s Algorithm for the All-Pairs Shortest-Paths Problem – Optimal Binary Search Trees – The Knapsack Problem and Memory Functions.

#### UNIT – IV

**Backtracking:** N-Queens Problem – Hamiltonian Circuit Problem – Subset Sum Problem – **Branch and Bound:** Assignment Problem – Knapsack Problem – Travelling Salesman Problem.

**UNIT - V**

P, NP and NP-Complete Problems – Approximation Algorithms for NP-Hard Problems – Approximation Algorithms for the Travelling Salesman Problem – Approximation Algorithms for the Knapsack Problem.

**Text Book**

1. Anany Levitin, “Introduction to the Design and Analysis of Algorithms”, Pearson Education, 2008.

**Reference Books**

1. S.K. Basu, “Design Methods and Analysis of Algorithms”, Prentice Hall, 2005.
2. Thomas H.Cormen, Charles E.Leiserson, Ronald L.Rivest, “Introduction to Algorithms”, Prentice Hall 1990.
3. Introduction to design and Analysis of Algorithms - S.E. Goodman, ST. Hedetniem- TMH.
4. Ellis Horowitz, Satraj Sahni and Sanguthevar Rajasekaran, Fundamentals of Computer Algorithms, Universities Press, Second Edition, Reprint 2009.

### Course Outcomes (COs)

On successful completion of the course, the students will be able to

| CO Number | CO Statement   | Knowledge Level |
|-----------|--|-----------------|
| CO1       | Understand fundamental algorithmic design concepts and techniques for computational problem solving.   | K1 & K2         |
| CO2       | Apply an appropriate algorithm design techniques for solving problem.  | K2 & K3         |
| CO3       | Ability to analyze the performance of algorithms by comparing the efficiency of algorithms with asymptotic complexity.                         | K4              |
| CO4       | Ability to design algorithms using standard paradigms like: Greedy, Divide and Conquer, Dynamic Programming Backtracking and branch and bound. | K5 & K6         |
| CO5       | Ability to understand P & NP class problems for formulating solutions using standard approaches.   | K6              |

**K1– Remember, K2– Understand, K3– Apply, K4 –Analyze, K5– Evaluate, K6 –Create**

### Mapping of COs with POs

| Core – II                      |            | Course Code: 20PCS1C02 |         | Course Title: Advanced Web Technology |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                           |
| I                              | 4          | 60                     | 4       | 100                                   |

### Course Objectives

1. Explore the backbone of web page creation by developing .NET skill.
2. Enrich knowledge about HTML control and web control classes
3. Provide depth knowledge about ADO.NET
4. Understand the need of usability, evaluation methods for web services
5. To promote the web designing skills and data handling capabilities

### **UNIT – I**

**OVERVIEW OF ASP.NET** - The .NET Framework – Learning the .NET Languages : Data Types – Declaring Variables- Scope and Accessibility- Variable Operations- Object Based Manipulation- Conditional Structures- Loop Structures- Functions and Subroutines. Types, Objects and Namespaces : The Basics about Classes- Value Types and Reference Types- Advanced Class Programming- Understanding Name Spaces and Assemblies. Setting Up ASP.NET and IIS.

### **UNIT – II**

**Developing ASP.NET Applications** - ASP.NET Applications: ASP.NET Applications– Code Behind- The Global.aspx Applicationfile- Understanding ASP.NET Classes- ASP.NET Configuration. Web Form Fundamentals: A Simple Page Applet- Improving the Currency Converter- HTML Control Classes- The Page Class- Accessing HTML Server Controls. Web Controls: Web Control Classes – AutoPostBack and Web Control Events- Accessing Web Controls. Using Visual Studio.NET: Starting a Visual Studio.NET Project- Web Form Designer- Writing Code- Visual Studio.NET Debugging.

### **UNIT – III**

**Working with Data** - Overview of ADO.NET - ADO.NET and Data Management- Characteristics of ADO.NET-ADO.NET Object Model. ADO.NET Data Access : SQL Basics– Select , Update, Insert, Delete Statements- Accessing Data- Creating a Connection- Using a Command with a DataReader - Accessing Disconnected Data - Selecting Multiple Tables – Updating Disconnected Data. Data Binding: Single Value Data Binding- Repeated Value Data Binding- Data Binding with Databases. Data List – Data Grid.

#### UNIT – IV

**Web Services** - Web Services Architecture : Internet Programming then and now- WSDL– SOAP- Communicating with a Web Service-Web Service Discovery and UDDI. Creating Web Services : Web Service Basics- The StockQuote Web Service – Documenting the Web Service- Testing the Web Service- Web Service Data Types- ASP.NET Intrinsic Objects.

#### UNIT – V

**Advanced ASP.NET** - Component Based Programming: Creating a Simple Component – Properties and State - Database Components - Using COM Components. Custom Controls: User Controls - Deriving Custom Controls. Implementing Security: Determining Security Requirements- The ASP.NET Security Model - Forms Authentication- Windows Authentication.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Understanding basic concept of Web Technology.  | K1, K2          |
| CO2       | Recognize an importance of validation control, cookies and session.                                     | K3& K4          |
| CO3       | Applying the knowledge of ASP.NET object, ADO.NET data access and SQL to develop a client server model. | K4, K5, K6      |
| CCC       | Recognize the difference between Data list and Data grid controls in accessing data                     | K4              |
| CO5       | Enable to create a simple component and Database components in ASP.Net.                                 | K5, K6          |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

### Mapping of COs with POs

| Core – III                     |            | Course Code: 20PCS1C03 |         | Course Title: Advanced Database Management Systems |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks  |
| I                              | 4          | 60                     | 4       | 100  |

### Course Objectives

1. To understand and apply the principles of Relational model and SQL.
2. To understand the use of E-R model and Normalization.
3. To understand the concept of parallel, distributed and object based databases.
4. To know the concept of Spatial, Temporal databases and advanced transaction processing.

### **UNIT – I**

Introduction to the Relational Model and SQL: Structure of Relational Databases, Database Schema, Keys, Schema Diagrams, Relational Query Languages, Relational Operations. INTRODUCTION TO SQL: Overview of the SQL Query Language, SQL Data Definition, Basic Structure of SQL Queries, Additional Basic Operations, Set Operations, Null Values, Aggregate Functions, Nested Subqueries, Modification of the Database.

### **UNIT – II**

Database Design and E-R Model: Overview of the Design Process, The Entity-Relationship Model, Constraints, Removing Redundant Attributes in Entity Sets, Entity-Relationship Diagrams. Relational Database Design: Features of Good Relational Designs, Atomic Domains and First Normal Form, Decomposition Using Functional Dependencies, Functional Dependency Theory, Algorithms for Decomposition, Decomposition Using Multivalued Dependencies, More Normal Forms.

### **UNIT – III**

Parallel Databases: Introduction, I/O Parallelism, Interquery Parallelism, Intraquery Parallelism, Intraoperation Parallelism, Interoperation Parallelism. Distributed Databases: Homogeneous and Heterogeneous Databases, Distributed Data Storage, Distributed

Transactions, Commit Protocols, Concurrency Control in Distributed Databases, Availability, Distributed Query Processing.

#### **UNIT – IV**

Object-Based Databases: Complex Data Types, Structured Types and Inheritance in SQL, Table Inheritance, Array and Multiset Types in SQL, Object-Identity and Reference Types in SQL, Object Oriented versus Object Relational. XML: Structure of XML Data, XML Document Schema, Querying and Transformation, API to XML, Storage of XML Data, XML Applications.

#### **UNIT – V**

Spatial and Temporal Data: Time in Databases, Spatial and Geographic Data, Multimedia Databases. Advanced Transaction Processing: Transaction-Processing Monitors, Transactional Workflows, E-Commerce, Main-Memory Databases, Real-Time Transaction Systems, Long-Duration Transactions.

### Course Objectives

To extend student's Logical and Mathematical maturity and ability to deal with abstraction and to introduce most of the basic terminologies used in computer science courses and application of ideas to solve practical problems.

#### UNIT – I

**Mathematical Logic Connectives:** Negation – Conjunction – Disjunction – Statement Formulas and Truth Table – Conditional and Bi-conditional – Well-Formed Formulas-Tautologies-Examples Only. (Chapter 1: Sections 1.2.1 to 1.2.4, 1.2.6 to 1.2.8, Page No: 7-14 & 18-26).

#### UNIT – II

**Mathematical Logic (Continued) Normal Forms:** Disjunctive Normal Forms – Conjunctive Normal Forms – Principal Disjunctive Normal Forms – Principal Conjunctive Normal Forms-Examples Only. (Chapter 1: Sections 1.3.1 to 1.3.4, Page No: 50-58).

**The Theory of Inference for the Statement Calculus:** Validity using Truth Tables – Rules of Inference – Consistency of Premises and Indirect Method of Proof-Examples Only. (Chapter 1: Sections 1.4.1 to 1.4.3, Page No: 65-73).

#### UNIT – III

**Set Theory Relations and Ordering:** Relations–Properties of Binary Relation in a Set.

**Functions:** Definition and Introduction – Composition of Functions – Inverse Functions.

**Natural Numbers:** Peano Axioms and Mathematical Induction-Examples Only. (Chapter 2: Sections 2.3.1-2.3.2 and 2.4.1-2.4.3 and 2.5.1, Page No: 148-155, 192-203 and 220-224).

## UNIT – IV

**Lattices and Boolean Algebra Lattices as Partially Ordered Sets:** Definition and Examples – Some Properties of Lattices- Boolean Algebra-Definition and Example – Sub Algebra, Direct Product and Homomorphism – Boolean Functions – Boolean Forms and Free Boolean Algebra – Values of Boolean Expression and Boolean Functions-Examples Only. (Chapter 4: Sections 4.1.1-4.1.2, 4.2.1-4.2.2 and 4.3.2, Page No: 378-384, 397-403 and 406-416)

## UNIT – V

**Graph Theory** Introduction-Basic Definitions-Degree of a Vertex-Some Special Simple Graphs-Connectedness in Directed Graphs-Shortest Path Algorithm-Spanning Trees-Minimum Spanning Trees-Prim's Algorithm-Kruskal's Algorithm-Example 7.2, 7.3, 7.4, and 7.5 only. (Chapter 7, Page No: 366-371, 393-398, 416-417 and 422-425)

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | Solve discrete mathematics problems that involve: computing permutations and combinations of a set, fundamental enumeration principles and graph theory.                           | K1, K2          |
| CO2       | Demonstrate a working knowledge of set notation and elementary set theory, recognize the connection between set operations and logic, and prove elementary results involving sets. | K3& K4          |
| CO3       | Formulate and interpret statements presented in Boolean logic. Reformulate statements from common language to formal logic.  | K4, K5, K6      |
| CO4       | Apply truth tables and the rules of propositional and predicate calculus   | K4              |
| CO5       | Learn about Graph Theory.  | K5, K6          |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

**Course Objectives**

1. To develop skills in implementing algorithms through C++ and to explore the features of C++ by applying to solve Data structure problems.
2. To write programs in C++ to solve problems using divide and conquer strategy.
3. To write programs in C++ to solve problems using backtracking strategy.
4. To write programs in C++ to solve problems using greedy and dynamic programming techniques.

**List of Programs**

1. Apply the divide and conquer technique to arrange a set of numbers using merge sort.
2. Apply the divide and conquer technique to implement Strassen's matrix multiplication Algorithm.
3. Compute the transitive closure of a given directed graph using Warshall's Algorithm.
4. Implement 0/1 knapsack problem using Dynamic programming.
5. Find minimum cost spanning tree of a given undirected graph using Kruskal's Algorithm.
6. Find minimum cost spanning Tree of a given undirected graph using Prim's Algorithm.
7. Implement Queen's problem using backtracking.
8. Implement Knapsack problem using backtracking.
9. Solve Dijkstra's Algorithm using greedy technique.
10. Solve subset sum problem using backtracking.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Ability to apply the divide and conquer technique for solving problems.                       | K1, K2          |
| CO2       | Implementation of Dynamic Programming to solve knapsack problem                               | K3 & K4         |
| CO3       | Solve graph problems using algorithm design techniques such as Greedy.                        | K4, K5, K6      |
| CO4       | Implementation of backtracking techniques to solve various problems.                          | K4              |
| CO5       | Ability to write programs in C++ to solve various problems using algorithm design techniques. | K5, K6          |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6- Create**

### Course Objectives

1. Learn how to create websites using Asp.Net
2. Implement the advanced web concepts using Asp.Net and Ado.Net
3. Learn to use Asp.Net web controls
4. Design web applications using Asp.Net and Ado.Net

### List of Programs

#### Programs using ASP.NET Server controls

1. Create a website for a bank and include types of navigation.
2. Write a program to perform Asp.Net State.
3. Design Image Mapping using Asp.Net
4. Create the following using web controls
  - a) Money conversion
  - b) Temperature conversion
5. Write a program to create an advertisement using Ad rotator.
6. Create a user control that contains a list of colors. Add a button to the Web Form which when clicked changes the color of the Form to the color selected from the list.
7. Create a user control that displays the current date and time. Include it in a Web Form and refresh it each time a button is clicked.
8. Create a user control that receives the user name and password from the user and validates them. If the user name is “Radiant” and the password is “asp.net” then the user is authorized, otherwise not.

#### Programs using ADO.NET and ASP.NET

1. Create a web application to insert 3 records inside the SQL database table having following fields(DeptId, DeptName, EmpName, Salary). Update the salary for any one employee and increment it to 15% of the present salary. Perform delete operation on 1

row of the database table.

2. Create a Web App to display all the Empname and Deptid of the employee from the database using SQL source control and bind it to GridView. Database fields are(DeptId, DeptName, EmpName, Salary).

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | Apply .NET concepts to design and develop web applications         | K1, K2          |
| CO2       | Create a basic website using ASP.Net concepts                      | K3 & K4         |
| CO3       | Design web page and connect to the backend databases               | K4, K5, K6      |
| CO4       | Applying different functionalities in ASP.Net and ADO.Net          | K4              |
| CO5       | Ability to create database oriented web applications with ADO.Net. | K5, K6          |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

### Course Objectives

1. To study Distributed operating system concepts
2. To understand hardware, software and communication in distributed OS
3. To learn the distributed resource management components.
4. Practices to learn concepts of OS and Program the principles of Operating Systems

### **UNIT – I**

Introduction – Operating System Definition – Functions of Operating System – Types of Advanced Operating System – Design Approaches – Synchronization Mechanisms – concepts of a Process – Critical Section Problem – Process Deadlock – Models of Deadlock – Conditions for Dead – lock – System with single-unit requests, Consumable Resources, Reusable Resources.

### **UNIT – II**

Distributed Operating Systems: Introduction- Issues – Communication Primitives – Inherent Limitations –Lamport’s Logical Clock , Vector Clock, Global State , Cuts – Termination Detection – Distributed Mutual Exclusion – Non Token Based Algorithms – Lamport’s Algorithm - Token Based Algorithms –Distributed Deadlock Detection – Distributed Deadlock Detection Algorithms – Agreement Protocols

### **UNIT – III**

Distributed Resource Management – Distributed File Systems – Architecture – Mechanisms – Design Issues – Distributed shared Memory – Architecture – Algorithm – Protocols – Design Issues – Distributed Scheduling – Issues – Components – Algorithms.

**UNIT – IV**

Failure Recovery and Fault Tolerance – Concepts – Failure Classifications – Approaches to Recovery in Concurrent Systems – Synchronous and Asynchronous Check Pointing and Recovery – Check pointing in Distributed Database Systems – Fault Tolerance Issues – Two-Phase and Nonblocking Commit Protocols – Voting Protocols – Dynamic Voting Protocols.

**UNIT – V**

Multiprocessor and Database Operating Systems – Structures – Design Issues – Threads – Process Synchronization – Processor Scheduling – Memory Management – Reliability/Fault Tolerance – Database Operating Systems – Concepts – Features of Android OS, Ubuntu, Google Chrome OS and Linux Operating Systems.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Clear understanding on several resource management techniques like distributed shared memory and other resources. | K1, K2          |
| CO2       | Knowledge on mutual exclusion and Deadlock detection of Distributed operating system.                             | K3 & K4         |
| CO3       | Able to design and implement algorithms of distributed shared memory and commit protocols.                        | K4, K5, K6      |
| CO4       | Able to design and implement fault tolerant distributed systems   | K4              |
| CO5       | Learn the structure and design issues of Multiprocessor and Database Operating Systems.                           | K5, K6          |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

### Mapping of COs with Pos

| Core – VI                      |            | Course Code: 20PCS2C06 |         | Course Title: Advanced Java Programming |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                             |
| II                             | 3          | 45                     | 4       | 100                                     |

### Course Objectives

1. To deepen student's programming skills by analyzing the real world problem in a programmer's point of view and implement the concepts in real time projects in Java.
2. To learn basics of Java programming concepts like Packages, Applets, Database Connectivity Enable the students to learn network programs in Java
3. Acquire Knowledge about JDBC and Servlet.

### **UNIT – I**

An Overview of Java: Object Oriented Programming-Lexical Issues- Class Libraries. Data Types, Variables, and Arrays: Primitive Types-Literals Variables-Type Conversion and Casting- Arrays. Operators: Arithmetic Bitwise – Relational - Boolean Logical Assignment – Conditional - Operator Precedence. Control Statements: Selection statements-Iteration Statements-Jump Statements.

### **UNIT – II**

Classes and Methods: Fundamentals- Declaring objects- Methods - Constructors-Garbage Collection- Overloading Methods. Recursion – Access Control- Nested and Inner Classes - Command Line Arguments - Inheritance: Basics- Super Class- Method overriding- Abstract Class. Packages and Interfaces: Packages-Access Protection-Importing Packages- Interfaces.

### **UNIT – III**

Exception Handling: Fundamentals- types- Uncaught Exceptions- Try and Catch- Throw-throws-finally-built-in exceptions. Input /Output: The I/O Classes and Interfaces – File - I/O Exceptions - Byte Streams - Character Steams – Serialization. The Applet Class: Basics-Architecture - Applet Skeleton - Display methods – Status Window - Passing Parameters. Event Handling: Event Model – Classes - KeyEventClassEvent Listener Interfaces.

**UNIT – IV**

AWT: Window Fundamentals - Working with Frame Windows – Graphics –Working with Color - Working with Fonts - Controls – Labels- Buttons - Check Box – Choice Controls – Lists - Scroll Bars - Text Field - Text Area - Layout Menu Bars and Menus. JavaBeans: Advantages - Introspection – Properties - Java Beans API. Servlets: Life Cycle-Simple Servlet - Cookies-session tracking.

**UNIT – V**

Using Relational Databases: Introduction- JDBC Drivers for RDBM Systems – Using Java.sql API - Using Javax.sql API - Connection Pooling. Network Programming: Introduction- Working with URLs-Working with Sockets- Remote Method Invocation.

|--------------------------------|------------|------------------------|---------|---|
| Core – VII                     |            | Course Code: 20PCS2C07 |         | Course Title: Cryptography and Network Security |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                                     |
| II                             | 3          | 45                     | 4       | 100   |

### Course Objectives

1. To understand the cryptography theories and algorithms.
2. To understand necessary approaches and techniques to build protection mechanisms in order to secure computer networks.
3. To know about the malicious software & firewalls.

### UNIT – I

**Introduction** - Security Trends – Legal, Ethical and Professional Aspects of Security, Need for Security at Multiple levels, Security Policies – Model of Network Security – Security Attacks, Services and Mechanisms – OSI Security Architecture – Classical Encryption Techniques: Substitution Techniques, Transposition Techniques, Steganography- Foundations of Modern Cryptography: Perfect Security – Information Theory – Product Cryptosystem – Cryptanalysis.

### UNIT – II

**Symmetric Encryption and Message Confidentiality** - Symmetric Encryption Principles, Symmetric Block Encryption Algorithms, Stream Ciphers and RC4 , Cipher Block Modes of Operation, Location of Encryption Devices, Key Distribution. Public-key Cryptography and Message Authentication: Approaches to Message Authentication, Secure Hash Functions and HMAC, Public-Key Cryptography Principles, Public-Key Cryptography Algorithms, Digital Signatures, Key Management.

### UNIT – III

**Authentication Applications** - Kerberos, x.509 Authentication Service, Public-Key Infrastructure. Electronic Mail Security: Pretty Good Privacy (PGP), S/MIME.

## UNIT – IV

**IP Security** - IP Security Overview, IP Security Architecture, Authentication Header, Encapsulating Security Payload, Combining Security Associations. **Web Security:** Web Security Considerations, Secure Socket Layer(SSL) and Transport Layer Security(TLS), Secure Electronic Transaction(SET). **Network Management Security:** Basic Concepts of SNMP, SNMPv1 Community Facility, SNMPv3.

## UNIT – V

**Intruders –** Intruders, Intrusion Detection, Password Management. **Malicious Software:** Virus and Related Threats, Virus Countermeasures, Distributed Denial of Service Attacks. **Firewalls:** Firewall Design Principles, Trusted System, Common Criteria for Information Technology Security Evaluation.

### Course Objectives

1. To understand the concept of optimization
2. To develop mathematical model of real life cases
3. To study Optimization algorithms
4. understand various mathematical applications in industries

#### **UNIT – I**

Linear Programming Problem (LPP): Formulations and Graphical Solution of (2 variables) Canonical and Standard Terms of Linear Programming Problem, Simplex Method, Two Phase Simplex Method.

#### **UNIT – II**

Duality in LPP- Dual Problem to Primal- Primal to Dual Problem-Duality Simplex Method- Revised Simplex Method-Revised Simplex Algorithm-Revised Simplex Method Versus Simplex Method.

#### **UNIT – III**

Transportation Model: North West Corner Method, Least Cost Method, and Vogel's Approximation Method. Determining Net Evaluation-Degeneracy in TP- Assignment Model : Hungarian Assignment Model – Travelling Salesman Problem.

#### **UNIT – IV**

Replacement Problem: Replacement Policy for Equipment that Deteriorate Gradually, Replacement of Item that Fail Suddenly-Individual and Group Replacement, Problems in Mortality and Staffing.

**UNIT – V**

Project Scheduling PERT/CPM Networks – Fulkerson’s Rule – Measure of Activity – PERT Computation – CPM Computation – Resource Scheduling.

### Course Objectives

1. To enable the students to implement different java packages.
2. To develop the students with the skills to implement different java tools.
3. Learn to use Asp.Net web controls
4. Design web applications using Asp.Net and Ado.Net

### **List of Programs**

#### **Use JAVA Programming Language to implement the following:**

1. To create applets incorporating the following Features:
  - a. Create a color palette with matrix of buttons
  - b. Set background and foreground of the control text area by selecting a color from color palette.
  - c. In order to select Foreground or background use check box control as radio buttons
  - d. To set background images
2. Use GridLayout to design a calculator and simulate the functions of simple calculator.
3. To create Input output and Random files
4. To develop chat application with datagram sockets and datagram packets.
5. To invoke servlet from HTML forms.
6. To invoke servlet from Applets.
7. To invoke servlet from JSP.
8. Simple client/server application.
9. JDBC to interact with database.
10. To create multiple chat applications using TCP packets.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | Learn the Internet Programming, using Java Applets.  | K1, K2          |
| CO2       | Apply event handling on AWT and Swing components.  | K3 & K4         |
| CO3       | Create a full set of UI widgets and other components, including windows, menus, buttons, checkboxes, text fields, scrollbars and scrolling lists, using Abstract Windowing Toolkit (AWT) & Swings. | K4, K5, K6      |
| CO4       | Learn to access database through Java programs, using Java Data Base Connectivity (JDBC).  | K4              |
| CO5       | Create dynamic web pages, using Servlets and JSP.  | K5, K6          |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

|----------------------------|------------------------|-------------------------------|---------------------|------------------------------|--|
| <b>Core Practical – IV</b> |                        | <b>Course Code: 20PCS2P04</b> |                     | <b>Course Title: DOS Lab</b> |  |
| <b>Semester</b><br>II      | <b>Hours/Week</b><br>4 | <b>Total Hours</b><br>60      | <b>Credits</b><br>2 | <b>Total Marks</b><br>100    |  |

**Course Objectives**

1. Understand the design aspects of operating system.
2. Exposure on usage of various operating systems.
3. Design modern distributed system components

**List of Experiments**

1. Simulate the following CPU scheduling algorithms
  - a) Round Robin b) SJF c) FCFS d) Priority
2. Simulate all file allocation strategies
  - a) Sequential b) Indexed c) Linked
3. Implement process strategies: creation of child, zombie, orphan process
4. Implement file organization strategies
  - a) single level b) Two level c) Hierarchical
5. Simulate Bankers Algorithm for Dead Lock Avoidance
6. Simulate Bankers Algorithm for Dead Lock Prevention
7. Simulate all page replacement algorithms
  - a) FIFO b) LRU c) LFU
8. Implement shared memory and semaphore concepts for inter process communication

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Understand the simulation of CPU scheduling algorithms and file allocation strategies.                | K1, K2          |
| CO2       | Develop distributed application using file allocation strategies.                                     | K3 & K4         |
| CO3       | Construct the program to demonstrate concept of centralized and distributed deadlock.                 | K4, K5, K6      |
| CO4       | Build distributed application to illustrate the concept of Page replacement algorithms.               | K4              |
| CO5       | Build the program to demonstrate concept of distributed mutual exclusion and process synchronization. | K5, K6          |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6- Create**

### Mapping of COs with POs

| Elective – I                   |            | Course Code: 20PCS1E01 |         | Course Title: Software Project Management |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                               |
| I                              | 4          | 60                     | 3       | 100                                       |

### Course Objectives

1. Understand the framework of project management
2. Learn to monitor and control the project
3. Know the sound knowledge in Agile method
4. Know the team, cost, quality and resource management
5. Identify and control the risk in the projects

### **UNIT – I**

**Project Management Framework:** Introduction: Project - Project management - Relationship among Project, Program and Portfolio management - Project and Operations Management- Role of Project Manager - Project Management Body of Knowledge - Enterprise Environmental Factors. Project Life Cycle and Organization: Overview of Project life Cycle - Projects vs Operational Work - Stakeholders - Organizational Influences on Project Management. **The Standard for Project Management of a Project:** Project Management Processes for a Project: Common Project Management Process Interactions - Projects Management Process Groups - Initiating Process Group - Planning Process Group - Executing Process Group - Monitoring and Controlling Process Group - Closing Process Group.

### **UNIT – II**

Choosing Methodologies and Technologies – Software Processes and Process Models – Choice of Process Models – The Waterfall Model– Prototyping – Other Ways of Categorizing Prototype - **Agile Methods** – Extreme Programming Selecting the Most Appropriate Process Model- Need of Agile - Iterative vs Incremental-Agile Manifesto and Mindset – Lean, Scrum and Kanban Methods-Uncertainty, Risk, and Lifecycle Selection-Scrum Elements Overview-5 Levels of Planning-Scrum Process Overview-Agile Team-Roles and Responsibilities- Epic-Feature-User Stories-PBI-The Sprint.

### UNIT – III

**The Project Management Knowledge Areas:** Project Integration Management: Develop Project Charter - Develop Project Management Plan - Direct and Manage Project Execution - Monitor and Control Project Work - Perform Integrated Change Control - Close Project or Phase. Project Scope Management: Collect Requirements - Define Scope - Create WBS - Verify Scope - Control Scope. Project Team Management: Define Activities - Sequence Activities - Estimate Activity Resources - Estimate Activity Durations - Develop Schedule - Control Schedule.

### UNIT – IV

Project Cost Management: Estimate Costs - Determine Budget - Control Costs. Project Quality Management: Plan Quality - Perform Quality Assurance - Perform Quality Control. Project Human Resource Management: Develop Human Resource Plan - Acquire Project Team - Develop Project Team - Manage Project Team. Project Communications Management: Identify Stakeholders - Plan Communications - Distribute Information - Manage Stakeholder Expectations - Report Performance.

### UNIT – V

Project Risk Management: Plan Risk Management - Identify Risks - Perform Qualitative Risk Analysis - Perform Quantitative Risk Analysis - Plan Risk Responses - Monitor and Control Risks. Project Procurement Management: Plan - Conduct - Administer - Close procurements.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | Analyze the scope, cost, timing, and quality of the project, at all times focused on project success as defined by project stakeholders.             | K1              |
| CO2       | Align the project to the organization's strategic plans and business justification throughout its lifecycle  | K1 & K2         |
| CO3       | Identify project goals, constraints, deliverables, performance criteria, control needs, and resource requirements in consultation with stakeholders. | K3              |
| CO4       | Implement project management knowledge, processes, lifecycle and the embodied concepts, tools and techniques in order to achieve project success.    | K3              |
| CO5       | Adapt projects in response to issues that arise internally and externally.   | K3              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

| Elective – I                   |            | Course Code: 20PCS1E02 |         | Course Title: Wireless Networks |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                     |
| I                              | 4          | 60                     | 3       | 100                             |

### Course Objectives

1. To impart adequate knowledge of wireless communication
2. To Study about Wireless Networks, Protocol Stack and Standards.
3. To Study about Fundamentals of 3G Services, Its Protocols and Applications.
4. To Study about Evolution of 4G Networks, its Architecture and Applications.

#### **UNIT – I**

**WIRELESS LAN** - Introduction-WLAN Technologies: Infrared, UHF Narrowband, Spread Spectrum -IEEE802.11: System Architecture, Protocol Architecture, Physical Layer, MAC Layer, 802.11b, 802.11a – Hiper LAN: WATM, BRAN, HiperLAN2 – Bluetooth: Architecture, Radio Layer, Baseband Layer, Link Manager Protocol, Security – IEEE802.16- WIMAX: Physical Layer, MAC, Spectrum Allocation For WIMAX

#### **UNIT – II**

**MOBILE NETWORK LAYER** - Introduction – Mobile IP: IP Packet Delivery, Agent Discovery, Tunneling And Encapsulation, IPV6-Network Layer In The Internet- Mobile IP Session Initiation Protocol – Mobile Ad-Hoc Network: Routing, Destination Sequence Distance Vector, Dynamic Source Routing.

#### **UNIT – III**

**MOBILE TRANSPORT LAYER** - TCP Enhancements For Wireless Protocols – Traditional TCP: Congestion Control, Fast Retransmit/Fast Recovery, Implications of Mobility – Classical TCP Improvements: Indirect TCP, Snooping TCP, Mobile TCP, Time Out Freezing, Selective Retransmission, Transaction Oriented TCP – TCP Over 3G Wireless Networks.

## UNIT – IV

**WIRELESS WIDE AREA NETWORK** - Overview Of UTMIS Terrestrial Radio Access Network-UMTS Core Network Architecture: 3G-MSC, 3G-SGSN, 3G-GGSN, SMS-GMSC/SMS-IW MSC, Firewall, DNS/DHCP-High Speed Downlink Packet Access (HSDPA)- LTE Network Architecture And Protocol.

## UNIT – V

4G NETWORKS - Introduction – 4G Vision – 4G Features And Challenges – Applications Of 4G – 4G Technologies: Multicarrier Modulation, Smart Antenna Techniques, OFDM-MIMO Systems, Adaptive Modulation And Coding with Time Slot Scheduler, Cognitive Radio.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | Students will get the knowledge of wireless communication  | K1              |
| CO2       | Knows the structures and standards of wireless communication   | K1 & K2         |
| CO3       | Conversant With The Latest 3G/4G And WiMAX Networks And Its Architecture.  | K3              |
| CO4       | Design and Implement Wireless Network Environment For Any Application Using Latest Wireless Protocols And Standards. | K4              |
| CO5       | Implement Different Type Of Applications For Smart Phones And Mobile Devices With Latest Network Strategies          | K4              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

|--------------------------------|------------|------------------------|---------|--|
| Elective – I                   |            | Course Code: 20PCS1E03 |         | Course Title: Object Oriented System Development |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                                      |
| I                              | 4          | 60                     | 3       | 100  |

### Course Objectives

1. Introduce the concept of Object-oriented design and understand the fundamentals of OOSD life cycle.
2. Familiar with evolution of object-oriented model, classes and its notations
3. Practice UML in order to express the design software projects.
4. Specify, analyze and design the use case for a particular system.
5. Enrich knowledge about DBMS, designing classes and object oriented testing.

### **UNIT – I**

**Fundamentals of OOSD** - Overview of Object Oriented Systems Development : Two Orthogonal View of the Software - OOSD Methodology - Why an Object Object Orientation. Object Basics: Object Oriented Philosophy- Objects – Attributes – Object Respond to Messages – Encapsulation and Information Hiding – Class Hierarchy – Polymorphism – Object Relationship and Associations. OOSD Life Cycle : Software Development Process – OOSD Use Case Driven Approach – Reusability.

### **UNIT – II**

**Methodology, Modeling and UML** - Object Oriented Methodologies: Rumbaugh et al.'s Object Modeling Technique – The Booch Methodology – The Jacobson et al. Methodology – Patterns – Frameworks - The Unified Approach. Unified Modeling Language : Static and Dynamic Models – Why Modeling - UML Diagrams – UML Class Diagram – Use Case Diagram - UML Dynamic Modeling – Packages and Model Organization.

### **UNIT – III**

**Object Oriented Analysis** - Object Oriented Analysis Process : Business Object Analysis - Use Case Driven Object Oriented Analysis – Business Process Modeling – Use-Case model – Developing Effective Documentation . Classification : Classifications Theory – Approaches

for Identifying Classes – Noun Phrase Approach – Common Class Patterns Approach – Use-Case Driven Approach – Classes, Responsibilities, and Collaborators - Naming Classes. Identifying Object Relationships, Attributes, and Methods : Association – Super-Sub Class Relationship – Aggregation – Class Responsibility – Object Responsibility.

#### UNIT – IV

**Object Oriented Design** - Object Oriented Design Process and Design Axioms - OOD Process- OOD Axioms – Corollaries – Design Patterns. Designing Classes : Designing Classes – Class Visibility – Refining Attributes – Designing Methods and Protocols – Packages and Managing Classes. Access Layer: Object Store and Persistence – DBMS – Logical and Physical Database Organization and Access Control – Distributed Databases and Client Server Computing — Multidatabase Systems – Designing Access Layer Classes. View Layer : Designing View Layer Classes – Macro Level Process – Micro Level Process – The Purpose of View Layer Interface – Prototyping the User Interface.

#### UNIT – V

**Software Quality** - Software Quality Assurance : Quality Assurance Tests – Testing Strategies – Impact of Object Orientation on Testing - Test Cases- Test Plan – Continuous Testing. System Usability and Measuring User Satisfaction: Usability Testing – User Satisfaction test – A tool for Analyzing User Satisfaction. System Usability and Measuring User Satisfaction : Introduction – Usability Testing.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Show how the object-oriented approach differs from the traditional approach to systems analysis and design.   | K1              |
| CO2       | Analyze, design, document the requirements through use case driven approach   | K1 & K2         |
| CO3       | Explain the importance of modeling and how the Unified Modeling Language (UML) represents an object-oriented system using a number of modeling views. | K3              |
| CO4       | Recognize the difference between various object relationships: inheritance, association and aggregation.  | K4              |
| CO5       | Show the role and function of test cases, testing strategies and test plans in developing object-oriented software.                                   | K4              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

|--------------------------------|------------|------------------------|---------|---|
| Elective – II                  |            | Course Code: 20PCS2E04 |         | Course Title: Data Mining And Warehousing |
| Semester II                    | Hours/Week | Total Hours            | Credits | Total Marks                               |
|                                | 3          | 45                     | 3       | 100                                       |

### Course Objectives

1. Learn the basics of Data Mining and Data Warehousing.
2. To recognize the various data mining and warehousing tools
3. To develop the proficiency for planning & applying the DM techniques.

#### UNIT – I

**Data Mining And Data Preprocessing:** Data Mining – Motivation – Definition – Data Mining on Kind of Data –Functionalities – Classification – Data Mining Task Primitives – Major Issues in Data Mining – Data Preprocessing – Definition – Data Clearing – Integration and Transformation – Data Reduction.

#### UNIT – II

**Data Warehousing:** Multidimensional Data Model –Data Warehouse Architecture – Data Warehouse Implementation –From data Warehousing to Data Mining – Online Analytical Processing - Online Analytical Mining.

#### UNIT – III

**Frequent Patterns, Associations And Classification:** The Apriori Algorithm – Definition of Classification and Prediction – Classification by Decision Tree Induction - Bayesian Classification – Rule Based Classification – Classification by Back Propagation – Lazy Learners – K-Nearest Neighbor – Other Classification Methods.

#### UNIT – IV

**Cluster Analysis:** Definition – Types of data in Cluster Analysis – Categorization of major Clustering Techniques – Partitioning Methods – Hierarchical Clustering – BIRCH - ROCK – Grid Based Methods – Model Based Clustering Methods – Outlier Analysis.

## UNIT – V

**Spatial, Multimedia, Text And Web Data:** Spatial Data Mining – Multimedia Data Mining – Text Mining – Mining the World Wide Web – Data Mining Applications – Trends in Data Mining.

|-----------------------|------------------------|-------------------------------|---------------------|--------------------------------------|--|
| <b>Elective – II</b>  |                        | <b>Course Code: 20PCS2E05</b> |                     | <b>Course Title: Compiler Design</b> |  |
| <b>Semester</b><br>II | <b>Hours/Week</b><br>3 | <b>Total Hours</b><br>45      | <b>Credits</b><br>3 | <b>Total Marks</b><br>100            |  |

**Course Objectives**

1. Discover principles, algorithms and techniques that can be used to construct various phases of compiler.
2. Acquire knowledge about finite automata and regular expressions.
3. Learn the concept of context free grammars, compiler parsing techniques.
4. Explore knowledge about Syntax Directed definitions and translation scheme.
5. Understand intermediate machine representations and actual code generation

**UNIT – I**

**Lexical analysis** - Language Processors, The Structure of a Compiler, Parameter Passing Mechanism – Symbol Table - The Role of the Lexical Analyzer - Input Buffering - Specification of Tokens - Recognition of Tokens – Finite Automata - Regular Expression to Automata.

**UNIT – II**

**Syntax Analysis** - The Role of the Parser - Context-Free Grammars - Writing a Grammar - Top Down Parsing - Bottom-Up Parsing - LR Parsers- LALR Parsers.

**UNIT – III**

**Semantic Analysis** - Inherited and Synthesized Attributes – Dependency Graphs – Ordering the Evaluation of Attributes – S-attributed Definitions – L-attributed Definitions – Applications of Syntax Directed Translation – Syntax Directed Translations Schemes - Storage Organization – Stack Allocation of Space.

**UNIT – IV**

**Intermediate Code Generation** - Variants of Syntax Trees – Three Address Code – Types and Declarations - Translation of Expressions – Type Checking - Control Flow - Back Patching - Switch Statements - Procedure Calls.

## UNIT – V

**Code Generation and Code Optimization** - Issues in the Design of a Code Generator - The Target Language – Address in the Target Code – Basic Block and Flow Graphs – Optimization of Basic Blocks - A Simple Code Generator – Peephole Optimization.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | Posses knowledge about finite automata and regular expressions.  | K1              |
| CO2       | Understand Lexical, syntax and Semantic analysis   | K2              |
| CO3       | Learn the concept of context free grammars, compiler parsing techniques.                                       | K2              |
| CO4       | Learn Code Generation and Code Optimization  | K2              |
| CO5       | Use the knowledge of patterns, tokens & regular expressions for solving a problem in the field of data mining. | K4              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

### Mapping of COs with POs

| Elective – II                  |            | Course Code: 20PCS2E06 |         | Course Title: Embedded Systems |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                    |
| II                             | 3          | 45                     | 3       | 100                            |

### Course Objectives

1. To teach all aspects of design and development of an embedded System.
2. To understand hardware and software of development system.
3. Describe the hardware software co-design and firmware design approaches.
4. Know the RTOS internals, multitasking, task scheduling, task communication and synchronization.
5. Learn the development life cycle of embedded system.

### **UNIT – I**

Introduction to Embedded System - Embedded System vs General Computing Systems - History - Classification - Major Application Areas - Purpose of Embedded systems - Smart Running Shoes: The Innovative Bonding of Lifestyle with Embedded Technology. Characteristics and Quality Attributes of Embedded Systems.

### **UNIT – II**

Elements of an Embedded System - Core of the Embedded System: General Purpose and Domain Specific Processors, ASICs, PLDs, COTS - Memory - Sensors and Actuators - Communication Interface: Onboard and External Communication Interfaces - Embedded Firmware - Reset Circuit, Brown-out Protection Circuit, Oscillator Unit, Real-Time Clock, and Watchdog Timer - PCB and Passive Components.

### **UNIT – III**

Embedded Systems - Washing Machine: Application-Specific - Automotive: Domain Specific. Hardware Software Co-Design - Computational Models - Embedded Firmware Design Approaches - Embedded Firmware Development Languages - Integration and Testing of Embedded Hardware and Firmware.

## UNIT – IV

RTOS based Embedded System Design: Operating System Basics - Types of Operating Systems - Tasks, Process and Threads - Multiprocessing and Multitasking - Task Scheduling- Task Communication - Task Synchronisation - Device Drivers - Choosing an RTOS.

## UNIT – V

Components in Embedded System Development Environment, Files Generated During Compilation, Simulators, Emulators and Debugging - Objectives of Embedded Product Development Life Cycle - Different Phases of EDLC - EDLC Approaches - Trends in Embedded Industry - Case Study: Digital Clock.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Acquire knowledge about microcontrollers embedded processors and their applications.                            | K1              |
| CO2       | Understand the internal architecture and interfacing of different peripheral devices with Microcontrollers.     | K2              |
| CO3       | Apply key concepts of embedded systems like interrupts interaction, drivers, and ports with peripheral devices. | K3              |
| CO4       | Analyze the design concept of embedded systems  | K4              |
| CO5       | Design real time embedded systems using the concepts of RTOS  | K6              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

## EDC-EXTRA DISCIPLINARY COURSE

| Program: M.Sc Computer Science |            |                          |         |  |
|--------------------------------|------------|--------------------------|---------|--|
| EDC                            |            | Course Code: 20PCS2EDC01 |         | Course Title: Principles of Information Technology |
| Semester                       | Hours/Week | Total Hours              | Credits | Total Marks  |
| II                             | 4          | 60                       | 4       | 100  |

### Course Objectives

To acquire skills relating to IT basics, computer applications, programming, interactive medias, Internet basics etc.

#### **UNIT – I**

Business Environment: Business and Information Technology – Business in the Information Age – about Information Technology – what is an Information System – Information Technology in the Modern Organization.

#### **UNIT – II**

Computer Hardware – Significance of Hardware – Central Processing Unit – Computer Memory – Computer Hierarchy – Input Technologies – Output Technologies – Strategic Hardware Issues. Computer Software: Software History and Significance – System Software – Application Software – Software Issues – Programming Languages – Enterprise Software.

#### **Unit – III**

Managing Organizational Data and Information: Basics of Data Arrangement and Access – Traditional File Environment – Modern Approach: Database Management Systems – Logical Datamodels – Data Warehouses – Telecommunications and Networks: The Telecommunication System – Networks – Telecommunications Applications – Internet Evolution of the Internet – Operation of the Internet – WWW- Intranets and Extranets.

#### **UNIT – IV**

Functional, Enterprises, and Inter-organizational Systems: Information System to Support Business Functions – Transaction Processing Information Systems – Accounting and Finance

System – Marketing and Sales System – Production and Operations Management System – Integrated Information System and Enterprises Resource Planning – Inter-organizational / Global Information System. - Electronic Commerce.

### UNIT – V

Information Systems Development: Information System Planning – Traditional Systems Development Life Cycle – Alternative Methods for System Development – System Development Outside the IS Department – Building Internet and Intranet Applications – Implementing: Ethics, Impacts and Security.

### Text Book

1. Turban, Rainer, Potter "Introduction to Information Technology," 2nd edition, Wiley India, 2007

### Reference Book

1. V. Rajaraman – Introduction to Information Technology, Prentice Hall of India, 2007.

### Course Outcomes (COs)

On successful completion of the course, the students will be able to

| CO Number | CO Statement  | Knowledge Level |
|-----------|---|-----------------|
| CO1       | Understand fundamental concepts and techniques of Information technology. | K1 & K2         |
| CO2       | Have a basic understanding of personal computers and their operations.    | K2 & K3         |
| CO3       | Learn about computer Hardware   | K4              |
| CO4       | Implementing Ethics, Impacts and Security of IT                           | K5 & K6         |
| CO5       | Be able to identify issues related to information security                | K6              |

**K1– Remember, K2– Understand, K3– Apply, K4 –Analyze, K5– Evaluate, K6 –Create**

### Mapping of COs with POs

| CO  | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 |
|-----|-----|-----|-----|-----|-----|-----|

| CO3 | S   | S   | M   | S   | S   | M   |
| CO4 | S   | S   | S   | S   | S   | S   |
| CO5 | S   | S   | S   | M   | S   | S   |

S – Strong,

M – Medium,

L – Low

| Program: M.Sc Computer Science |            |                          |         |  |
|--------------------------------|------------|--------------------------|---------|--|
| EDC                            |            | Course Code: 20PCS2EDC02 |         | Course Title: Fundamentals of Computers and Communications |
| Semester                       | Hours/Week | Total Hours              | Credits | Total Marks  |
| II                             | 4          | 60                       | 4       | 100  |

### Course Objectives

1. Understanding of basic concepts of computer.
2. Learn the fundamentals of hardware, software and programming.
3. Introducing to system and application software.
4. Understanding of communication and computer security.

#### UNIT – I

**Computer:** Introduction – Components of Computers – Advantages and Disadvantages of using Computers – Computer Software – Categories of Computers -Elements of an Information Systems. The Components of the Systems Unit: Processor – Data Representation – Memory – Expansion Slot and Adapter Cards – Ports and Connectors - Buses – Bays – Power Supply – Mobile Computers and Devices.

#### UNIT – II

**Input and Output Device:** What is Input - What are Input devices – Keyboard – Pointing Device – Mouse – Other Pointing Devices – Controllers for Gaming and Media Players – Voice Input – Input for PDAs, Smart Phones and Tablet PCs- Digital Cameras – Video Input – Scanners and Reading Devices Terminals – Biometric Input - Input Devices for Physically challenged Users- Output: What is Output – Display Devices – Flat Panel Displays – CRT Monitors – Printers – Speakers, Headphones and Ear phones – Other Output Devices – Output Device for Physically Challenged Users – Storage Devices.

#### UNIT – III

**Operating Systems and Utility Programs:** System Software – Operating System – Operating System Functions – Operating System Utility Programs – Types of Operating Systems – Stand alone Operating Systems – Network Operating Systems – Embedded Operating System – Standalone Utility Programs. Application Software: Application

Software – Business Software – Graphics and Multimedia Software – Application Software for Communication.

#### UNIT – IV

**Internet and World Wide Web:** Internet – History of the Internet – How the Internet Works – WWW – E-commerce – Other Internet Services – Netiquette. Communications and Networks: Communications – Uses of Computer Communications – Networks – Network communication Standards – Communication Software – Communication Over the Telephone Network – Communication Devices – Home Networks – Communications Channel – Physical Transmission Media and Wireless Transmission Media.

#### UNIT – V

**Database Management:** Databases, Data and Information, The Hierarchy of Data – Maintaining Data – File Processing Versus Databases – Database Management Systems – Relational, Object Oriented and Multidimensional Databases – Web Databases – Database Administration. Computer Security: Computer Security Risks – Internet and Network Attacks – Unauthorized Access and Use.

**Course Objectives**

1. Understanding Framework and Anatomy of E-Commerce Applications.
2. Learn the concept of Electronic payment system
3. Study about Standardization and EDI and EDI Software Implementation.

**UNIT – I**

Electronic Commerce- Electronic Commerce Framework-The Anatomy of Electronic Commerce Applications- Electronic Commerce Consumer Applications- Electronic Commerce Organization Applications- Components of I-Way – Network Access Equipment.

**UNIT – II**

Architecture Framework for Electronic Commerce- World Wide Web as the Architecture – Consumer Oriented Applications – Mercantile Process Models – Mercantile Models from the Consumers Perspective and Merchant’s Perspective.

**UNIT – III**

**Electronic Payment Systems:** Types of Electronic Payment Systems – Digital Token Based Electronic Payment Systems – Smart Card and Credit Card Based Electronic Payment Systems – Risk and Electronic Payment Systems – Designing Electronic Payment Systems.

**UNIT – IV**

Electronic Data Interchange – EDI Applications in Business – EDI: Legal, Security and Privacy Issues EDI and Electronic Commerce – Standardization and EDI – EDI Software Implementation.

**UNIT – V**

**Internet and World Wide Web:** Origin of the Internet – New Uses for the Internet – Commercial Use of the Internet – Growth of the Internet- Advertising on the Internet.

| Core – IX                      |                 | Course Code: 20PCS3C09 |              | Course Title: Digital Image Processing |
| Semester<br>III                | Hours/Week<br>4 | Total Hours<br>60      | Credits<br>4 | Total Marks<br>100                     |

### Course Objectives

1. Understand the fundamental concept of Digital Image Processing.
2. To provide complete knowledge on Digital Image Processing methods in Spatial domain and Frequency domain, Edge detection, Compression, Segmentation.
3. Learn Morphological concepts, which enable the students to understand the concepts and implement them empirically.

### UNIT – I

**Fundamentals:** Image Sensing and Acquisition, Image Sampling and Quantization, Relationship Between Pixels; Random Noise; Gaussian Markov Random Field,  $\sigma$ -field, Linear and Non-linear Operations; Image Processing Models: Causal, Semi-causal, Non-Causal Models.

**Color Models:** Color Fundamentals, Color Models, Pseudo-color Image Processing, Full Color Image Processing, Color Transformation, Noise in Color Images.

### UNIT – II

**Spatial Domain:** Enhancement in Spatial Domain: Point Processing; Mask Processing; Smoothing Spatial Filters; Sharpening Spatial Filters; Combining Spatial Enhancement Methods.

**Frequency Domain:** Image Transforms: FFT, DCT, Karhunen-Loeve Transform, Hotlling's  $T^2$  Transform, Wavelet Transforms and their Properties, Image Filtering in Frequency Domain.

### UNIT – III

**Edge Detection:** Types of Edges; Threshold; Zero-Crossing; Gradient Operators: Roberts, Prewitt, and Sobel Operators; Residual Analysis Based Technique; Canny Edge Detection. Edge Features and their Applications.

## UNIT-IV

**Image Compression:** Fundamentals, Image Compression Models, Elements of Information Theory. Error Free Compression: Huff-man Coding; Arithmetic Coding; Wavelet Transform Based Coding; Lossy Compression: FFT; DCT; KLT; DPCM; MRFM Based Compression; Wavelet Transform Based; Image Compression Standards.

## UNIT – V

**Image Segmentation:** Detection and Discontinuities: Edge Linking and Boundary Deduction; Threshold; Region-Based Segmentation. Segmentation by Morphological Watersheds. The Use of Motion in Segmentation, Image Segmentation Based on Color.

**Morphological Image Processing:** Erosion and Dilation, Opening and Closing, Hit-Or-Miss Transformation, Basic Morphological Algorithms, Gray-Scale Morphology.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Review the fundamental concepts of a digital image processing system.   | K1 & K2         |
| CO2       | Analyze images in the frequency domain using various transforms.  | K1 & K2         |
| CO3       | Evaluate the techniques for image enhancement and image restoration. Categorize various compression techniques  | K2              |
| CO4       | Interpret Image compression standards, and Interpret image segmentation and representation techniques.  | K2              |
| CO5       | Gain idea to process various image used in various fields such as weather forecasting, Diagnosis of various disease using image such as tumor, cancer etc | K3              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6- Create**

**Course Objectives**

1. To understand Smart Objects and IoT Architectures
2. To learn about various IOT - related protocols
3. To develop IoT infrastructure for popular applications
4. Understand the concept of the Web of Things and the relationship between the IoT and WoT.

**UNIT – I**

**Introduction to IoT:** Internet of Things - Physical Design- Logical Design- IoT Enabling Technologies - IoT Levels and Deployment Templates - Domain Specific IoTs - IoT and M2M - IoT System Management with NETCONF-YANG- IoT Platforms Design Methodology.

**UNIT – II**

**IoT Architecture:** M2M High-Level ETSI Architecture - IETF Architecture for IoT - OGC Architecture - IoT Reference Model - Domain Model - Information Model - Functional Model - Communication Model - IoT Reference Architecture.

**UNIT – III**

**IoT Protocols:** Protocol Standardization for IoT – Efforts – M2M and WSN Protocols – SCADA and RFID Protocols – Unified Data Standards – Protocols – IEEE 802.15.4 – BACNet Protocol – Modbus– Zigbee Architecture – Network layer – 6LowPAN - CoAP – Security.

**UNIT – IV**

**Web of Things:** Web of Things Versus Internet of Things – Two Pillars of the Web – Architecture Standardization for WoT– Platform Middleware for WoT – Unified Multitier WoT Architecture – WoT Portals and Business Intelligence. **Cloud of Things:** Grid/SOA and Cloud Computing – Cloud Middleware – Cloud Standards – Cloud Providers and Systems – Mobile Cloud Computing – The Cloud of Things Architecture.

## UNIT – V

**Applications:** The Role of the Internet of Things for Increased Autonomy and Agility in Collaborative Production Environments - Resource Management in the Internet of Things: Clustering, Synchronisation and Software Agents. Applications - Smart Grid – Electrical Vehicle Charging.

### Course Objectives

1. To Learn about Machine Intelligence and Machine Learning applications
2. To implement and apply machine learning algorithms to real-world applications.
3. To identify and apply the appropriate machine learning technique to classification, pattern recognition, optimization and decision problems.
4. To understand how to perform evaluation of learning algorithms and model selection.

### UNIT – I

**Introduction** : Learning Problems – Perspectives and Issues – Concept Learning – Version Spaces and Candidate Eliminations – Inductive bias – Decision Tree Learning – Representation – Algorithm – Heuristic Space Search.

### UNIT – II

**Neural Networks and Genetic Algorithms** : Neural Network Representation – Problems – Perceptrons – Multilayer Networks and Back Propagation Algorithms – Advanced Topics – Genetic Algorithms – Hypothesis Space Search – Genetic Programming – Models of Evaluation and Learning.

### UNIT – III

**Bayesian and Computational Learning** : Bayes Theorem – Concept Learning – Maximum Likelihood – Minimum Description Length Principle – Bayes Optimal Classifier – Gibbs Algorithm – Naïve Bayes Classifier – Bayesian Belief Network – EM Algorithm – Probability Learning – Sample Complexity – Finite and Infinite Hypothesis Spaces – Mistake Bound Model.

**UNIT – IV**

**Instant Based Learning :** K- Nearest Neighbour Learning – Locally Weighted Regression – Radial Basis Functions – Case Based Learning.

**UNIT – V**

**Advanced Learning :** Learning Sets of Rules – Sequential Covering Algorithm – Learning Rule Set – First Order Rules – Sets of First Order Rules – Induction on Inverted Deduction – Inverting Resolution – Analytical Learning – Perfect Domain Theories – Explanation Base Learning – FOCL Algorithm – Reinforcement Learning – Task – Q-Learning – Temporal Difference Learning.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | Have a good understanding of the fundamental issues and challenges of machine learning   | K1 & K2         |
| CO2       | Have an understanding of the strengths and weaknesses of many popular machine learning approaches.   | K1 & K2         |
| CO3       | Appreciate the underlying mathematical relationships within and across Machine Learning algorithms and the paradigms of supervised and un-supervised learning. | K2              |
| CO4       | Know about Instant based Learning and Advanced Learning.   | K3              |
| CO5       | Be able to design and implement various machine learning algorithms in a range of real-world applications  | K4              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6- Create**

#### Mapping of COs with POs

**Program: M.Sc Computer Science**

| Core – XII      |                 | Course Code: 20PCS3C12 |              | Course Title: Data Analytics |  |
|-----------------|-----------------|------------------------|--------------|------------------------------|--|
| Semester<br>III | Hours/Week<br>4 | Total Hours<br>60      | Credits<br>4 | Total Marks<br>100           |  |

**Course Objectives**

1. To introduce the concept of Big Data Analytics.
2. To learn basic and advanced methods of big data technology and tools, including MapReduce and Hadoop and its ecosystem.
3. To enable students to learn machine learning.
4. To make students well versed with MapReduce Hadoop.

**UNIT – I**

**Introduction to Big Data Analytics :** Big Data Overview – Data Structures – Analyst Perspective on Data Repositories - State of the Practice in Analytics – BI Versus Data Science - Current Analytical Architecture – Drivers of Big Data – Big Data Ecosystem - Data Analytics Lifecycle – Data Discovery – Data Preparation – Model Planning – Model Building – Communicate Results – Operationalize.

**UNIT – II**

**Basic Data Analytic Methods Using R :** Introduction to R programming – R Graphical User Interfaces – Data Import and Export – Attribute and Data Types – Descriptive Statistics Exploratory Data Analysis : Visualization Befor Analysis – Dirty Data – Visualizing a Single Variable – Examining Multiple Variables Data Exploration Versus Presentation -- Statistical Methods of Evaluation : Hypothesis Testing – Difference of Means – Wilcoxon Rank- Sum Test – Type I and Type II Errors – Power and Sample Size – ANOVA..

**UNIT – III**

**Advanced Analytical Theory and Methods:** Clustering – K Means – Use Cases – Overview – Determining number of clusters – Diagnostics – Reasons to Choose and Cautions – Additional Algorithms - Association Rules : A Priori Algorithm – Evaluation of Candidate Rules – Applications of Association Rules – Validation and Testing – Diagnostics.

Regression : Linear Regression and Logistic Regression :- Use cases – Model Description – Diagnostics - Additional Regression Models.

#### UNIT – IV

**Classification** : Decision Trees – Overview – Genetic Algorithm – Decision Tree Algorithms – Evaluating Decision Tree – Decision Trees in R - Naïve Bayes – Bayes Theorem – Naïve Bayes Classifier – Smoothing – Diagnostics – Naïve Bayes in R – Diagnostics of Classifiers – Additional Classification Methods - Time Series Analysis : : Overview – Box – Jenkins Methodology – ARIMA Model – Autocorrelation Function – Autoregressive Models – Moving Average Models – ARMA and ARIMA Models – Building and Evaluating and ARIMA Model - Text Analysis : Text Analysis Steps – Example – Collecting – Representing Term Frequency – Categorizing – Determining Sentiments – Gaining Insights.

#### UNIT – V

**Advanced Analytics**-Technology and Tools: MapReduce and Hadoop : Analytics for Unstructured Data .- UseCases - MapReduce - Apache Hadoop – The Hadoop Ecosystem – pig – Hive – Hbase – Manout – NoSQL - Tools in Database Analytics : SQL Essentials – Joins – Set Operations – Grouping Extensions – In Database Text Analysis - Advanced SQL – Windows Functions – User Defined Functions and Aggregates – Ordered Aggregates-MADIib - Analytics Reports Consolidation – Communicating and operationalizing and Analytics Project – Creating the Final Deliverables : Developing Core Material for Multiple Audiences – Project Goals – Main Findings – Approach Model Description – Key Points Support with Data - Model Details – Recommendations – Data Visualization.

### Course Objectives

1. To implement mathematical aggregation operators in “R-script”.
2. To understand the Statistical operations in “R”.
3. Apply classification algorithms in R.

### **List of Experiments**

1. To get the input from user and perform numerical operations (MAX, MIN, AVG, SUM, SQRT, ROUND) using in R.
2. To perform data import/export (.CSV, .XLS, .TXT) operations using data frames in R.
3. To get the input matrix from user and perform Matrix addition, subtraction, multiplication, inverse transpose and division operations using vector concept in R.
4. To perform statistical operations (Mean, Median, Mode and Standard deviation) using R.
5. To perform data pre-processing operations i) Handling Missing data ii) Min- Max normalization
6. To perform dimensionality reduction operation using PCA for Houses Data Set
7. To perform Simple Linear Regression with R.
8. To perform K-Means clustering operation and visualize for iris data set
9. Write R script to diagnose any disease using KNN classification and plot the results.
10. To perform market basket analysis using Association Rules (Apriori).

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Perform numerical, mathematical and statistical operations in R.      | K1, K2          |
| CO2       | Import and export data using data frame in R.                         | K3 & K4         |
| CO3       | Perform data preprocessing, dimensionality reduction operations in R. | K4 & K5         |
| CO4       | Work with Simple Linear Regression and K-Means clustering algorithms. | K4              |
| CO5       | Understand the classification and association rule algorithms.        | K5, K6          |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

**Course Objectives**

1. To introduce concepts and data representations in bioinformatics
2. To develop required tools that aid in the analysis of biological data.
3. To introduce fundamentals of Sequence alignment and Gene Recognition
4. To discuss predictive methods and Protein Sequences

**UNIT – I**

Introduction: Bioinformatics: The Big Picture – Hemoglobin - Bioinformatics and Genomics - Access to Sequence Data and Literature Information: Introduction to Biological Databases, GenBank: Database of Most Known Nucleotide and Protein Sequences, Amount of Sequence Data, Organisms in GenBank, Types of Data in GenBank, Genomic DNA Databases, cDNA Databases Corresponding to Expressed Genes.

**UNIT – II**

Pairwise Sequence Alignment: Introduction - Definitions: Homology, Similarity, Identity – Gaps - Pairwise Alignment, Homology, and Evolution of Life - Scoring Matrices - Dayhoff Model: Accepted Point Mutations - PAM1 Matrix - PAM and Other PAM Matrices - Important Alternative to PAM - Alignment Algorithms.

**UNIT – III**

Basic Local Alignment Search Tool (BLAST): Introduction - BLAST Search Steps - BLAST Algorithm Parts: List, Scan, Extend - BLAST Algorithm: Local Alignment Search Statistics and E-Value - BLAST Search Strategies - Principles of BLAST Searching.

**UNIT – IV**

Advanced Database Searching: Introduction - Specialized BLAST Sites - Organism-Specific BLAST Sites - Ensembl BLAST - Specialized BLAST-Related Algorithms - Finding Distantly Related Proteins: Position-Specific Iterated BLAST (PSI-BLAST) - Assessing

Performance of PSI-BLAST. Multiple Sequence Alignment: Introduction - Definition of Multiple Sequence Alignment - Typical Uses and Practical Strategies of Multiple Sequence Alignment.

### UNIT – V

Gene Expression: Microarray Data Analysis – Introduction - Microarray Data Analysis Software and Data Sets - Reproducibility of Microarray Experiments - Microarray Data Analysis: Preprocessing - Scatter Plots and MA Plots - Global and Local Normalization - Accuracy and Precision - Robust Multiarray Analysis (RMA) - Microarray Data Analysis: Inferential Statistics - Expression Ratios - Hypothesis Testing.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Interpret the concepts of bioinformatics.                   | K1 & K2         |
| CO2       | Identify different types of biological sequence.            | K2              |
| CO3       | Understanding BLAST.  | K2              |
| CO4       | Analyse multiple sequences and find conserved regions.      | K3              |
| CO5       | Analyse genomic sequences and identify encoded gene regions | K3              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

### Mapping of COs with Pos

| CO  | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 |

| Semester III                   | Hours/Week | Total Hours            | Credits | Total Marks                         |
|                                | 4          | 60                     | 4       | 100                                 |

### Course Objectives

1. The learning objectives of this course are to introduce students to the mathematical foundations of computation including automata theory; the theory of formal languages and grammars; the notions of algorithm, decidability, complexity, and computability.
2. To enhance/develop students' ability to understand and conduct mathematical proofs for computation and algorithms.

#### **UNIT – I**

Introduction to formal Proof – Additional Forms of Proof – Inductive Proofs – Finite Automata (FA) – Deterministic Finite Automata (DFA) – Non-deterministic Finite Automata (NFA) – Finite Automata with Epsilon transitions.

#### **UNIT – II**

Regular Expression – FA and Regular Expressions – Proving Languages not to be Regular – Closure Properties of Regular Languages – Equivalence and Minimization of Automata.

#### **UNIT – III**

Context-Free Grammar (CFG) – Parse Trees – Ambiguity in Grammars and Languages – Definition of the Pushdown Automata – Languages of a Pushdown Automata – Equivalence of Pushdown Automata and CFG – Deterministic Pushdown Automata.

#### **UNIT – IV**

Normal forms for CFG – Pumping Lemma for CFL – Closure Properties of CFL – Turing Machines – Programming Techniques for TM. A language that is not Recursively Enumerable (RE).

## UNIT – V

An Undecidable problem RE – Undecidable Problems about Turing Machine – Post's Correspondence Problem – The classes P and NP.

| Semester<br>III                | Hours/Week<br>4 | Total Hours<br>60      | Credits<br>4 | Total Marks<br>100            |

### Course Objectives

1. The objective of this course is to provide students with the comprehensive and in-depth knowledge of Cloud Computing concepts, technologies, architecture and applications
2. Understand Cloud Computing fundamental issues, technologies, applications and implementations.
3. To expose the students to frontier areas of Cloud Computing and information systems, while providing sufficient foundations to enable further study and research.

#### UNIT – I

**Computing Basics:** Cloud Computing Definition- Characteristics- Benefit-Challenges- Distributed Systems- Virtualization-Service-Oriented Computing- Utility-Oriented Computing- Building Cloud Computing Environments- Computing Platforms & Technologies - Cloud Models – Cloud Service Examples - Cloud Based Services & Applications - Cloud concepts and Technologies.

#### UNIT – II

**Virtualization, Cloud Services and Platforms:** Virtualization: Virtualization- Characteristics- Taxonomy-Types- Pros and Cons- Examples Architecture: Reference Model- Types of Clouds- Compute Service - Storage Services - Cloud Database Services - Application Services - Content Delivery Services - Analytics Services - Deployment And Management Service - Identity And Access Management Services - Open Source Private Cloud Software.

#### UNIT – III

**Cloud Application Design and Development:** Design Consideration- Reference Architecture for Cloud Application - Cloud Application Design Methodologies - Data

Storage Approaches- Development in Python: Design Approaches – Application: Image Processing - Document Storage - Map Reduce - Social Media Analytics.

#### UNIT – IV

**Python for Cloud:** Introduction- Installing Python- Data Types & Data Structures- Control Flow- Functions- Modules- Packages- File Handling-Date/Time Operations – Classes- Python for Cloud: Amazon Web Services –Google Cloud Platform - Windows Azure –Map Reduced –Packages of Interest – Designing a RESTful Web API.

#### UNIT – V

**Big Data Analytics, Multimedia Cloud & Cloud Security:** Big Data Analytics: Clustering Big Data - Classification of Big Data – Recommendation Systems. Multimedia Cloud: Case Study: Live Video Stream App - Streaming Protocols – Case Study: Video Transcoding App- Cloud Security: CSA Cloud Security Architecture - Authentication - Authorization - Identity and Access management - Data Security - Key Management- Auditing- Cloud for Industry, Healthcare & Education.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | To understand the basic knowledge about the cloud computing techniques and architecture. | K1              |
| CO2       | To learn the presents cloud computing collaborations and applications.                   | K2              |
| CO3       | To impart the new concept of various virtualization in cloud computing                   | K3              |
| CO4       | To gain knowledge of cloud services and cloud security                                   | K4              |
| CO5       | Apply Cloud in various Real-time Applications  | K6              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

### Mapping of COs with Pos

|--------------------------------|------------|------------------------|---------|--------------------------------|
| Elective – IV                  |            | Course Code: 20PCS4E10 |         | Course Title: Mobile Computing |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                    |
| IV                             | 8          | 120                    | 4       | 100                            |

### Course Objectives

1. Understand the basic concepts of mobile.
2. Be familiar with GPRS Technology.
3. system Be exposed to Ad-Hoc networks.
4. Gain knowledge about different mobile platforms and application development

#### **UNIT – I**

Basics of mobile - Mobile Device Profiles - Middleware and Gateways - Wireless Internet - Smart Clients - Three-tier Architecture- Design Considerations for Mobile Computing– Mobility and Location Based Services.

#### **UNIT – II**

Mobile Computing through Internet - Mobile-enabled Applications - Developing Mobile GUIs – VUIs and Mobile Applications – Characteristics and Benefits -Multichannel and Multi-modal User Interfaces – Synchronization and Replication of Mobile Data - SMS Architecture – GPRS – Mobile Computing through Telephony.

#### **UNIT – III**

Mobile Application Development - Android- wi-fi –GPS – Camera – Movement – Orientation - Event Based Programming – iOS/ windows CE - Blackberry – Windows Phone – M-Commerce- Structure – Pros & Cons – Mobile Payment System - J2ME

#### **UNIT – IV**

ADHOC Wireless Network - Ad Hoc Wireless Network –MAC Protocol – Routing Protocols - Transport Layer Protocol - QoS – Energy Management – Application Design – Workflow – Composing Applications – Dynamic Linking – Intents and Services – Communication via the Web.

**UNIT – V**

Security and Hacking - Password Security – Network Security – Web Security – Database Security - Wireless Sensor Network - Architecture and Design – Medium Access Control – Routing – Transport Layer – Energy Model.

**Course Objectives**

1. Develop the skills to gain a basic understanding of neural network theory and fuzzy logic theory.
2. Introduce students to artificial neural networks and fuzzy theory from an engineering perspective.

**UNIT – I**

Introduction: Soft Computing Constituents – Soft Computing Vs Hard Computing – Characteristics - Applications - Artificial Neural Network (ANN): Fundamental Concept – Application Scope - Basic Terminologies – Neural Network Architecture – Learning Process – Basic Models of ANN: McCulloch-Pitts Model – Hebb Network – Linear Separability.

**UNIT – II**

Supervised Learning Networks: Perceptron Networks – Adaline and Madaline Networks – Back Propagation Network – Radial Basis Function Network. Associative Memory Networks – BAM - Hopfield Network - Boltzmann Machine. Unsupervised Learning Networks: Kohonen Self Organizing Network – Counter Propagation Network – ART Network.

**UNIT – III**

Fuzzy Sets: Basic Concept – Crisp Set Vs Fuzzy Set - Operations on Fuzzy Set – Properties of Fuzzy Sets – Fuzzy Relations: Concept – Fuzzy Composition – Fuzzy Equivalence and Tolerance Relation - Membership Functions: Features – Fuzzification – Methods of Membership Value Assignments – Defuzzification – Methods.

**UNIT – IV**

Fuzzy Arithmetic – Extension Principle – Fuzzy Measures – Fuzzy Rules and Fuzzy Reasoning: Fuzzy Propositions – Formation of Rules – Decomposition of Rules – Aggregation of Rules – Approximate Reasoning – Fuzzy Inference and Expert Systems – Fuzzy Decision Making – Fuzzy Logic Control Systems.

**UNIT – V**

Genetic Algorithm: Fundamental Concept – Basic Terminologies – Traditional Vs Genetic Algorithm - Elements of GA - Encoding - Fitness Function – Genetic Operators: Selection – Cross Over - Inversion and Deletion - Mutation – Simple and General GA – The Schema Theorem - Classification of Genetic Algorithm – Genetic Programming – Applications of GA.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | Comprehend the fuzzy logic and the concept of fuzziness involved in various systems and fuzzy set theory.  | K1              |
| CO2       | Understand the concepts of fuzzy sets, knowledge representation using fuzzy rules, approximate reasoning, fuzzy inference systems, and fuzzy logic                     | K2              |
| CO3       | To understand the fundamental theory and concepts of neural networks, Identify different neural network architectures, algorithms, applications and their limitations. | K3              |
| CO4       | Understand appropriate learning rules for each of the architectures and learn several neural network paradigms and its applications.                                   | K4              |
| CO5       | Reveal different applications of these models to solve engineering and other problems.   | K6              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

### Course Objectives

1. To introduce fundamental concepts of security.
2. To introduce and discuss the relevance of security in operating system, web services.
3. To introduce fundamental concepts of secure electronic transactions.

#### UNIT – I

**Introduction:** Overview of Computer Security, Security Concepts, Need of Security- Threats- Deliberate Software Attacks, Deviation in Quality of Service, Attacks- Malicious Code, Brute Force, Timing Attack, Sniffers Access Control Mechanisms - Access Control, Access Control Matrix, Access Control in OS-Discretionary and Mandatory Access Control, Role-Based Access Control, Case Study SELinux.

#### UNIT – II

**Security Policies and Models:** Confidentiality Policies, BellLaPadula Model, Integrity Policies, Biba Model, Clark-Wilson Models, Chinese Wall Model, Waterfall Model.

#### UNIT – III

**Software Vulnerabilities:** Buffer and Stack Overflow, Crosssite Scripting(XSS) , and Vulnerabilities, SQL Injection and Vulnerabilities , Phishing. **Malware:** Viruses, Worms and Trojans. Topological Worms. Internet Propagation Models for Worms.

#### UNIT – IV

**Security in Current Domains:** Wireless LAN security - WEP Details. Wireless LAN Vulnerabilities – Frame Spoofing. Cellphone Security - GSM and UMTS Security. Mobile Malware - Bluetooth Security Issues.

**UNIT – V**

**Secure Electronics Transactions:** Framework, Strength and Weakness, Security in Current Applications : Online Banking , Credit Card Payment Systems. Web Services Security: XML, SOAP, SAML, RFID.

**Course Outcomes (COs)**

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Appreciate the common threats faced today                     | K1              |
| CO2       | Interpret the foundational theory behind information security | K2              |
| CO3       | Design a secure system  | K3              |
| CO4       | Identify the potential vulnerabilities in software            | K4              |
| CO5       | Appreciate the relevance of security in various domain.       | K6              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

**Mapping of COs with Pos**

**L – Low**

| Program: M.Sc Computer Science |            |                        |         |                                       |
|--------------------------------|------------|------------------------|---------|---------------------------------------|
| Elective – V                   |            | Course Code: 20PCS4E13 |         | Course Title: Social Network Analysis |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                           |
| IV                             | 8          | 120                    | 4       | 100                                   |

### Course Objectives

1. To understand the components of the social network.
2. To model and visualize the social network.
3. To mine the users in the social network.
4. To understand the evolution of the social network.
5. To know the applications in real time systems.

#### **UNIT – I**

Introduction to Web - Limitations of Current Web – Development of Semantic Web – Emergence of the Social Web – Statistical Properties of Social Networks -Network analysis - Development of Social Network Analysis - Key concepts and Measures in Network Analysis - Discussion Networks – Blogs and Online Communities – Web Based Networks.

#### **UNIT – II**

Visualizing Online Social Networks - A Taxonomy of Visualizations - Graph Representation - Centrality- Clustering - Node-Edge Diagrams - Visualizing Social Networks with Matrix-Based Representations- Node-Link Diagrams - Hybrid Representations - Modelling and Aggregating Social Network Data – Random Walks and their Applications –Use of Hadoop and Map Reduce – Ontological Representation of Social Individuals Relationships.

#### **UNIT – III**

Aggregating and Reasoning with Social Network Data, Advanced Representations – Extracting Evolution of Web Community from a Series of Web Archive - Detecting Communities in Social Networks - Evaluating Communities – Core Methods for Community Detection & Mining - Applications of Community Mining Algorithms – Node Node Classification in Social Networks.

## UNIT – IV

Evolution in Social Networks – Framework - Tracing Smoothly Evolving Communities - Models and Algorithms for Social Influence Analysis - Influence Related Statistics - Social Similarity and Influence - Influence Maximization in Viral Marketing - Algorithms and Systems for Expert Location in Social Networks - Expert Location without Graph Constraints - with Score Propagation – Expert Team Formation - Link Prediction in Social Networks - Feature based Link Prediction – Bayesian Probabilistic Models – Probabilistic Relational Models.

## UNIT – V

A Learning Based Approach for Real Time Emotion Classification of Tweets, A New Linguistic Approach to Assess the Opinion of Users in Social Network Environments, Explaining Scientific and Technical Emergence Forecasting, Social Network Analysis for Biometric Template Protection.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Ability to work on the internal components of the social network  | K1              |
| CO2       | Learn to model and visualize the social network                   | K2              |
| CO3       | Learn to mine the behaviour of the users in the social network    | K3              |
| CO4       | Enable to predict the possible next outcome of the social network | K4              |
| CO5       | Apply social network in real time applications                    | K6              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6- Create**

### Mapping of COs with POs

| Elective – V                   |            | Course Code: 20PCS4E14 |         | Course Title: Professional Ethics |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                       |
| IV                             | 8          | 120                    | 4       | 100                               |

### Course Objectives

To enable the students to create an awareness on Engineering Ethics and Human Values, to instill Moral and Social Values and Loyalty and to appreciate the rights of others.

#### **UNIT – I**

**Human Values:** Morals, Values and Ethics – Integrity – Work ethic – Service Learning – Civic Virtue – Respect for Others – Living Peacefully – Caring – Sharing – Honesty – Courage – Valuing Time – Cooperation – Commitment – Empathy – Self-Confidence – Character – Spirituality – Introduction to Yoga and Meditation for Professional Excellence and Stress Management.

#### **UNIT – II**

**Engineering Ethics:** Senses of Engineering Ethics – Variety of Moral Issues – Types of Inquiry – Moral Dilemmas – Moral Autonomy – Kohlberg’s Theory – Gilligan’s Theory – Consensus and Controversy – Models of Professional Roles – Theories about Right Action – Self-Interest – Customs and Religion – Uses of Ethical Theories.

#### **UNIT – III**

**Engineering as Social Experimentation:** Engineering as Experimentation – Engineers as Responsible Experimenters – Codes of Ethics – A Balanced Outlook on Law.

#### **UNIT – IV**

**Safety, Responsibilities and Rights:** Safety and Risk – Assessment of Safety and Risk – Risk Benefit Analysis and Reducing Risk – Respect for Authority – Collective Bargaining – Confidentiality – Conflicts of Interest – Occupational Crime – Professional Rights – Employee Rights – Intellectual Property Rights (IPR) – Discrimination.

**UNIT – V**

**Global Issues :** Multinational Corporations – Business Ethics - Environmental Ethics – Computer Ethics - Role in Technological Development – Weapons Development – Engineers as Managers – Consulting Engineers – Engineers as Expert Witnesses and Advisors – Honesty – Moral Leadership – Sample Code of Conduct.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | Understanding the fundamentals concept of professional ethics.                         | K1, K2          |
| CO2       | Learn about Engineering Ethics   | K2              |
| CO3       | Apply ethics in society, discuss the ethical issues related to engineering.            | K3 & K5         |
| CO4       | Realize the responsibilities and rights in the society                                 | K4              |
| CO5       | Enable to create awareness on Safety, Responsibilities and Rights of Professionalists. | K6              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

### Mapping of COs with POs

| Elective – V                   |            | Course Code: 20PCS4E15 |         | Course Title: Block Chain Technology |
| Semester                       | Hours/Week | Total Hours            | Credits | Total Marks                          |
| IV                             | 8          | 120                    | 4       | 100                                  |

### Course Objectives

1. Understand how blockchain systems (mainly Bitcoin and Ethereum) work
2. To securely interact with them
3. Design, build, and deploy smart contracts and distributed applications
4. Integrate ideas from blockchain technology into their own projects.

#### **UNIT – I**

**Basics:** Distributed Database, Two General Problem, Byzantine General Problem and Fault Tolerance, Hadoop Distributed File System, Distributed Hash Table, ASIC Resistance, Turing Complete. Cryptography: Hash Function, Digital Signature - ECDSA, Memory Hard Algorithm, Zero Knowledge Proof.

#### **UNIT – II**

**Blockchain:** Introduction, Advantage over Conventional Distributed Database, Blockchain Network, Mining Mechanism, Distributed Consensus, Merkle Patricia Tree, Gas Limit, Transactions and Fee, Anonymity, Reward, Chain Policy, Life of Blockchain Application, Soft & Hard Fork, Private and Public Blockchain.

#### **UNIT – III**

**Distributed Consensus:** Nakamoto Consensus, Proof of Work, Proof of Stake, Proof of Burn, Difficulty Level, Sybil Attack, Energy Utilization and Alternate.

#### **UNIT – IV**

**Cryptocurrency:** History, Distributed Ledger, Bitcoin protocols - Mining Strategy and Rewards, Ethereum - Construction, DAO, Smart Contract, GHOST, Vulnerability, Attacks, Sidechain, Namecoin

**UNIT – V**

**Cryptocurrency Regulation:** Stakeholders, Roots of Bit Coin, Legal Aspects-Cryptocurrency Exchange, Black Market and Global Economy. Applications: Internet of Things, Medical Record Management System, Domain Name Service and Future of Blockchain.

**Text Book**

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT   | KNOWLEDGE LEVEL |
|-----------|--|-----------------|
| CO1       | Design principles of Bitcoin, Ethereum and Simplified Payment Verification protocol. | K1              |
| CO2       | List and describe differences between proof-of-work and proof-of-stake consensus.    | K2              |
| CO3       | Interact with a blockchain system by sending and reading transactions.               | K3              |
| CO4       | Design, build, and deploy a distributed application.                                 | K4              |
| CO5       | Evaluate security, privacy, and efficiency of a given blockchain system.             | K6              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**

### Mapping of COs with Pos

### Course Objectives

1. To develop real time applications.
2. To implement the concepts of Software Project Management.
3. To teach students in applying skills and tools to manage and develop a solution.

### Course Outcomes (COs)

On Successful completion of the course the students will have demonstrated

| CO NUMBER | CO STATEMENT  | KNOWLEDGE LEVEL |
|-----------|---|-----------------|
| CO1       | Understand the concept and challenges of market.            | K1              |
| CO2       | Collect, manage ,plan and develop a real time application   | K2              |
| CO3       | Gain hands-on experience on different project models        | K3              |
| CO4       | Helps to understand the complexity and maintaining quality. | K4              |
| CO5       | Prepare documentation                                       | K4              |

**K1- Remember, K2- Understand, K3-Analyse, K4- Implement, K5-Evaluate, K6-Create**
