

Master of Science

Zoology

SRI VIDYA MANDIR ARTS & SCIENCE COLLEGE

(Autonomous)

[An Autonomous College Affiliated to Periyar University, Salem, Tamil Nadu]

[Accredited by NAAC with 'A' Grade with CGPA of 3.27]

[Recognized 2(f) & 12(B) Status under UGC Act of 1956]

Katteri – 636 902, Uthangarai (Tk), Krishnagiri (Dt)

Tamil Nadu, India

DEGREE OF MASTER OF SCIENCE IN ZOOLOGY
CHOICE BASED CREDIT SYSTEM (CBCS)

REGULATIONS AND SYLLABUS FOR
M.Sc. ZOOLOGY PROGRAMME
(SEMESTER PATTERN)

(For Students Admitted in the College from the Academic Year 2020-2021 Onwards)

Programme Outcomes (POs)

PO1	Students gain knowledge and skill in the fundamentals of animal sciences, Understands the complex interactions among various living organisms.
PO2	Analyse complex interactions among the various animals of different phyla, Their distribution and their relationship with the environment.
PO3	Apply the knowledge of internal structure of cell, its functions in control of Various metabolic functions of organisms.
PO4	Understands the complex evolutionary processes and behavior of animals.
PO5	Apply the knowledge and understanding of Zoology to one's own life and work.

Programme Specific Outcomes (PSOs)

PSO1	Understand the nature and basic concepts of cell biology, Genetics, Taxonomy, Physiology, Ecology and Applied Zoology.
PSO2	Perform procedures as per laboratory standards in the areas of Taxonomy, Physiology, Ecology, Cell biology, Genetics, Applied Zoology, Clinical science, tools and techniques of Zoology, Toxicology, Entomology, Nematology Sericulture, Biochemistry, Fish biology, Animal biotechnology, Immunology and Research methodology
PSO3	Analyse the relationships among animals, Plants and Microbes.
PSO4	Understand the applications of biological sciences in Apiculture, Aquaculture, and Medicine.
PSO5	Gains knowledge about research methodologies, effective communication and skills of problem solving methods.

SRI VIDYA MANDIR ARTS & SCIENCE COLLEGE

(Autonomous)

Master of Sciences (M.Sc.) in Zoology

Programme Pattern and Syllabus (CBCS)

(For Students Admitted in the College from the Academic Year 2020-2021 Onwards)

Sl. No.	Nature of the	Course Code	Name of the Course	Hours/Week	Credits	Marks		
SEMESTER III								
13	Core – VII	20PZO3C07	Aquaculture	6	4	25	75	100
14	Core – VIII	20PZO3C08	Immunology	6	4	25	75	100
15	Core – IX	20PZO3C09	Developmental Biology	5	4	25	75	100
16	Core – X	20PZO3C10	Research Methodology	5	4	25	75	100
17	Practical-III	20PZO3P03	Lab Course – III (Covering Core VII–X)	6	5	40	60	100
			Library/Seminar	2	-	-	-	-
Total				30	21	140	360	500
SEMESTER IV								
18	Core – XI	20PZO4C11	Evolution	5	4	25	75	100
19	Core – XII	20PZO4C12	Environmental Biology	5	4	25	75	100
20	Core – XIII	20PZO4C13	Economic Zoology	5	4	25	75	100
21	Practical-IV	20PZO4P04	Lab Course – IV (Covering Core XI-XIII)	4	5	40	60	100
22	Project	20PZO4PR01	Project Work and Viva Voce	11	6	25	75	100

Elective Courses

Semester	Course Code	Paper Title	Credits
Group – A			
Semester I	20PZO1E01	Applied Entomology	3
	20PZO1E02	Pathology and Clinical Laboratory Techniques	3
	20PZO1E03	Biological Techniques	3
Group – B			
Semester II	20PZO2E04	Cancer and Stem Cell Biology	3
	20PZO2E05	Microbiology	3
	20PZO2E06	Biotechnology	3

SUPPORTIVE PAPERS FOR OTHER PG COURSES

Semester	Course Code	Paper Title	Credits
Semester II	20PZOEDC01	Wild Life Biology	4
	20PZOEDC02	Vermitechnology	4

Note

CBCS – Choice Based Credit system,
CIA – Continuous Internal Assessment
ESE – End of Semester Examinations

PROGRAMME SYLLABUS

Program: M.Sc. Zoology				
Core – I		Course Code: 20PZO1C01		Course Title: Biology of Invertebrates
Semester I	Hours/Week 5	Total Hours 75	Credits 4	Total Marks 100

Course objectives

1. The students will classify the Invertebrates up to order level.
2. To understand the feeding and Respiratory mechanisms in Invertebrates.
3. To learn the mechanism of chemical coordination and Reproduction in Invertebrates.

UNIT – I

General Classification of invertebrates up to order level. **Locomotion** Amoeboid Flagella and Ciliary movement in protozoa. Locomotion in Annelida and Echinodermata.

UNIT – II

Nutrition: Nutrition in Protozoan – Sponges – Coelenterates and Platyhelminthes – Filter Feeding in Polychaetes and Mollusca. **Respiration:** Respiratory organs – Gills – Gill book – Book lungs – Parapodia – Trachea - Water vascular system with reference to respiration.

UNIT – III

Excretion: Excretory organs and excretory products in Invertebrates. **Circulatory system:** Circulation in Invertebrates – Open and Closed system. **Receptors:** Mechano reception – Chemoreception – Photoreception.

UNIT – IV

Nervous System: Primitive types – Coelenterates - Echinoderms and Hemichordates. Advanced types – Metameric nervous system – Giant nerve fibers – Molluscan nervous system and Learning in Cephalopods. Chemical co-ordination – Neurohumors – Neurohormones - Endocrine regulation of moulting in crustaceans and insects Pheromones and Allelochemicals.

UNIT – V

Chemical Co-ordination: Hormones and neurohormones – Endocrine regulation in Annelids, insects, and Molluscs – Pheromones and Allelochemicals. **Reproduction:** Asexual reproduction in Protozoans and Polychaetes. Unity in the early development of Metazoa – Protostomia and Deuterostomia. Phylogeny of invertebrates.

2. Barrington E.J.W (1979) Invertebrate Structure and Functions. 2nd Edition, ELBS and Nelson.
3. Barrington E.J.W (2012) Invertebrate Structure and Function, (2nd Ed) Affiliated East West Press Pvt. Ltd. New Delhi.
4. Hyman G.H (1955) The Invertebrates, Vol. I to VII, McGraw Hill Book Co., Inc., New York.
5. Kashya P .V (1997) Life of Invertebrates. Vikas Publishing House Pvt. Ltd., New Delhi.
6. Kotpal R.L (2014) Modern Text Book of Zoology – Invertebrates, (2016 Ed) Rastogi Publications – Meerut, New Delhi.
7. Pechenik J.A. (2005) Biology of the Invertebrates Graw Hill, India.
8. Veer Bala Rastogi (2017) Invertebrate Zoology, Rastogi Publications
9. Waterman A .J (1971) Chordate Structure and Function. The Macmillan Company.

Course Outcomes (COs)

On successful completion of the course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Define invertebrates based on their morphology.	K1
CO2	Know the feeding mechanisms of invertebrates.	K2
CO3	Get the knowledge about chemical coordination and reproduction In Invertebrates.	K3

K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze, K5 – Evaluate, K6 – Create

Mapping of Cos with POs

Program: M.Sc. Zoology				
Core – II		Course Code: 20PZO1C02		Course Title: Biology of Chordates
Semester	Hours/Week	Total Hours	Credits	Total Marks
I	5	75	4	100

Course Objectives

1. To motivate the students to learn the classification of chordates.
2. To facilitate the students to know about the salient features of fishes and Reptiles.
3. To make the students to understand the adaptations in Aves and Mammals.

UNIT – I

Origin of Chordates and classification of Prochordates: Geological time scale - Origin of chordates -Vertebrate relationships and Basic structure.

UNIT – II

Amphioxus – Type study

Pisces: General characters and Outline classification up to orders with suitable examples. Type study: Shark. **Amphibia:** Characters and Classification of Amphibia up to order level. Origin of Amphibia, External characters of Frog. Biology and Adaptive features of Anura - Urodela and Apoda- Parental care in Amphibia.

**UNIT – III**

Reptilia: General characters and outline classification. Morphology of Calotes. Origin and Adaptive radiation in Reptilia – Extinct Reptiles. Identification and study of Poisonous and Non-poisonous snakes of India.

UNIT – IV

Aves: General characters and outline classification

Type study: Pigeon. *Archaeopteryx* -Significance of *Archaeopteryx*-Migratory Birds.

UNIT – V

Mammalia: General characters and Outline classification. Type study: Rabbit.Importance of Marsupial Mammals. Exoskeleton structures of birds and mammals - Dentition in Mammals - Ruminant stomach in mammals and Echolocation in Bats.

Vertebrate Fossils: *Archaeopteryx* and Mesozoic mammals.

S – Strong

M – Medium

L – Low

Program: M.Sc. Zoology				
Core – III		Course Code: 20PZO1C03		Course Title: Cell and Molecular Biology
Semester	Hours/Week	Total Hours	Credits	Total Marks
I	5	75	4	100

Course Objectives

1. To enable the students to gain basic and comprehensive knowledge in the multidisciplinary science of eukaryotic cell biology.
2. To develop in-depth knowledge on molecular basis of cell functions.

UNIT – I

Discovery of Cell: Cell theory- Protoplasm theory - Prokaryotic and Eukaryotic cell differentiation - Cell Cycle and regulations. **Cell division:** Mitosis - Meiosis and their significance. **Cytoplasm:** Physical and biological properties of cytoplasmic matrix. **Plasma membrane:** Chemical composition Structure and functions. **Ribosome and Golgi bodies:** Ultrastructure types and functions. **Lysosome:** Chemical composition- Polymorphism and Functions. **Endoplasmic reticulum and plastids:** Ultrastructure - types and functions. **Mitochondria:** Ultrastructure and functions. Micro bodies Peroxisomes and Glyoxisomes

UNIT – II

Nucleus: Ultra-structure of nuclear membrane. Nucleolus- Nucleoplasm and Chromatic fibers.

Microtubules, microfilaments – Cilia and Flagella Signal **Transduction Pathways:** organization signals - Receptors. Ion channel coupled receptors – Secondary messengers. Amplifiers- Integrators and Signal hypothesis.

UNIT – III

Nucleic Acid: DNA as genetic material (direct and indirect evidences) – Structure and types of DNA and RNA. **Eukaryotic Chromosome:** Chromosome structure and organization - C-value paradox DNA – repetitive DNA and Junk DNA.

UNIT – IV

DNA Replication: Semi conservative and rolling circle models - Enzymes involved in replications. **Transcription and Translation:** RNA polymerase – Types- Properties and functions– Transcription process in prokaryotes and Eukaryotes – RNA processing – Capping- polyadenylation –Splicing - Introns and Exons.

UNIT – V

Chromosomal Aberration and Simple Mendelian Traits in Man Chromosomal Aberration: Introduction – Types of chromosomal abnormalities –Numerical chromosomal abnormalities – Autosomal abnormalities – Sex chromosome abnormalities. **Simple Mendelian Traits in Man:** Albinism – Taste Blindness for PTC – Eye Colour – Rh Blood group – Phenylketonuria and Sickle cell Anemia.

Course Outcomes (COs)

On successful completion of the course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Describe and discuss the properties and biological significance of the major classes of molecules found in living organisms and the relationship between molecular structure and biological function.	K1
CO2	Cell and molecular biology is platform for the emergency of different fields like genetic engineering, cell culture, biotechnology and molecular biology.	K2
CO3	Explain the structure of membranes and intracellular compartments and relate these to function.	K4
CO4	Describe the processes that control eukaryotic cell cycle and cell death.	K5
CO5	Link the rapid advances in cell and molecular biology to a better understanding of diseases, including cancer	K6

K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze, K5 – Evaluate, K6 – Create

Mapping of COs with POs

Program: M.Sc. Zoology				
Core – IV		Course Code: 20PZO1C04	Course Title: Biochemistry	
Semester	Hours/Week	Total Hours	Credits	Total Marks
I	5	75	4	100

Course Objectives

1. To enable the students to learn the biological phenomena at the molecular level.
2. To provide a basic and advanced understanding of the principles of Biochemistry.
3. To acquire knowledge on the fundamental chemical principles that governs complex biological systems.

UNIT – I

Bio macro molecules and their physiological significance : Structure of atoms- Molecules and chemical bonds- Properties of water. Classification- Composition- structure and Function of biomolecules - Carbohydrates- Lipids- Amino acids- Proteins-Nucleic acids and Vitamins.

UNIT – II

Metabolism of biomolecules Metabolism of Carbohydrates: Glycolysis- Pyruvate oxidation-Citric acid cycle- Glycogen metabolism- Gluconeogenesis and Pentose phosphate pathway. **Metabolism of Protein:** Deamination- Transamination and Decarboxylation. Urea cycle. **Lipid Metabolism:** Bioenergetics oxidation and Reduction reactions β Oxidation

UNIT – III

Enzymology Enzymes: Definition- Classification of enzymes and Enzyme kinetics - Enzyme regulation- Principle and Mechanism of enzyme catalysis - Isozymes. **Types of Inhibition:** Feedback and allosteric – Competitive - Uncompetitive and Non- competitive.

UNIT – IV

Porphyryns: Hemoglobin synthesis and Sickle cell anemia- Nucleoside and Nucleotide. **Nucleic acids:** Free nucleotides – Structure - Properties and Functions of RNA and DNA. Synthesis and Degradation of purine and Pyrimidine (De novo and salvage pathways). **Syndromes associated with nucleic acid metabolism:** Aicardi-Goutières syndrome (AGS), Lesch- Nyhan syndrome and GOUT Disease.

UNIT – V

Signal transduction: Hormones and their receptors - Steroid hormone receptor and Gene action. Peptide hormone receptor (cell surface receptors) - signaling through G-protein coupled receptors - Signal transduction pathways- Camp- cGMP - phosphatidyl inositol and Calcium as second messengers and Regulation of signaling pathways.

Course Out comes (COs)

On successful completion of the course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Describe the chemistry of carbohydrates, lipids, proteins and amino acids	K1
CO2	classification and structural organization of proteins	K2
CO3	Explain the mechanism of enzyme action and identify the classes of enzymes and factors affecting action	K3
CO4	Identify the class and functions of secondary metabolites	K4
CO5	Select the significance of Biochemistry	K5

K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze, K5 – Evaluate, K6 – Create

Mapping of COs with POS

Program: M.Sc. Zoology				
Elective – I		Course Code: 20PZO1E01		Course Title: Applied Entomology
Semester	Hours/Week	Total Hours	Credits	Total Marks
I	4	60	3	100

Course Objectives

1. To know taxonomical position and collection aspects of insects
2. To inculcate knowledge of morphology and physiology of insects
3. To impart knowledge about the growth and metamorphosis in insects.

UNIT – I

Taxonomy and Insect Collection: Classification of Insects up to order with examples for each order-Identification of Insects using Insect keys. **Insect Collection:** Methods- Preservation and Significance.

UNIT – II

Comparative Morphology: Mouth parts of insects – Head- Thorax- Abdomen- Genitalia and Appendages Integument structure.

UNIT – III

Anatomy and Physiology: Digestive system- Respiratory system- Circulatory system-

Excretory system and Reproductive system.

UNIT – IV

Insect culture practice: Apiculture – Sericulture and Lac culture. **Veterinary Entomology:** House flies- Mosquito and Bugs. **Vectors:** Cattles vectors – Social life of insects – Hibernation and Aestivation insects.

UNIT – V

Agriculture entomology: Pests of Vegetables – Pest of fruits – Pest of stored products and Pest of paddy- Pest of sugarcane – Pest ground nut – Biology and Control measures. **Integrated pest management (IPM):** Mechanical- Biological-Chemical and Legislative methods.

Elective – I		Course Code: 20PZO1E02		Course Title: Pathology and Clinical Laboratory Techniques
Semester	Hours/Week	Total Hours	Credits	Total Marks
I	4	60	3	100

Course Objectives

1. To understand fundamental analytical principles and processes used in clinical laboratory testing.
2. To understand the practical and theoretical basis for laboratory test selection and interpretation.
3. To respond appropriately and effectively to situations commonly encountered when taking call.
4. To begin learning the body of knowledge needed for board exams
5. To obtain an understanding of the elements that contribute to professional competence, including patient care, medical knowledge, practice-based learning, interpersonal and communications skills, professionalism, and systems-based practice.

UNIT – I

Basic Laboratory Equipments- Microscopy- Resolution, Magnification & Contrast- Light Microscopy-types- Electron Microscopy – Incubator - Hot Air Oven -Laminar Air flow- Water Bath –Centrifuge - Autoclave - Haemocytometer- Flame Photometer- Microtome – Glassware – Description of Glassware, its use, handling and Care

UNIT – II

Organization of clinical laboratory – Safety measures – Chemical, fire & Electrical – Lab Technician Duties and Responsibilities – Clinic borne infection and personnel hygiene Clinical Laboratory records – Quality control: Accuracy, Precision and Reference values, use of

chemicals and their interactions - Danger signs, production techniques and Disposal methods.

UNIT – III

Cytology: Blood Smear preparation cytology – Fixation of smears – Staining – Fluid cytology – Urine- Sputum - Spinal fluid -Pleural fluid - Scrape or brush cytology - Testing biopsy and Cytology specimens for cancer

UNIT – IV

Body fluids: Characteristics of Cerebrospinal Fluid – Synovial fluid – Pleural fluid – Pericardial fluids – Peritoneal fluids – Semen analysis- Physical, chemical & microscopic examination- Sperm count – Motility and Stool analysis.

UNIT – V

Urine – Composition, collection and Preservation, changes in composition of urine in relation to various diseases – Complete urine analysis – Physical - Chemical – Glucose - Protein, reducing substances- Ketone bodies -Blood pigments and Bile Sediments.

Course Outcomes (COs)

On successful completion of the course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	To understand fundamental analytical principles and processes used in clinical laboratory testing.	K2
CO2	To apply the practical and theoretical basis for laboratory test selection and interpretation.	K3
CO3	To analyse clinical, public health and management skill.	K5
CO4	Investigate the principles and uses of bioinstrumentation in medical laboratory.	K6

K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze, K5 – Evaluate, K6 – Create

Program: M.Sc. Zoology				
Elective-I		Course Code: 20PZO1E03		Course Title: Biological Techniques
Semester	Hours/Week	Total Hours	Credits	Total Marks
I	4	60	3	100

Course Objectives

1. To learn where things are in the lab.
2. To learn what the things in the lab are. This includes learning what things do, what they do not do, and where they should be used (if applicable).
3. To learn how to care for things in the lab.
4. To learn how to order and store supplies.
5. To learn some of the basic, most often used, most generally applicable: Tools, techniques, methodologies and methods of analysis used in biological research.

UNIT – I

Cytological Techniques: Microscopy – Optical and electron microscopy – Phase contrast microscopy – Interference microscopy – Dark field- Polarization - Fluorescence and X-ray microscopy. Micrometry – Measurements using ocular and Stage micrometers – Measurements of cells from any prepared slide.

UNIT – II

Separation Techniques: Chromatography – Thin layer and Column chromatography – HPLC - GC and GCMS; Principles and Applications; AGE and PAGE; PCR and Blotting techniques; Centrifugation Principles and Types (differential and density gradient).

UNIT – III

Analytical Techniques: pH meter - Colorimeter -Visible and UV spectrophotometer- NMR- XRD – SEM - TEM bomb colorimeter and Atomic absorption spectrophotometer

UNIT – IV

Molecular Biology Techniques: Isolation and purification of RNA - DNA (genomic and plasmid) and Proteins, different separation methods. Isolation, separation and Analysis of carbohydrate and Lipid molecules –RFLP - RAPD and AFLP techniques.

UNIT – V

Applications of Bioinformatics in various fields: Drug designing - Medicine (molecular, personalized, preventive) - Gene therapy-Design of microbes for various applications (waste cleanup-forensic studies - Bio-weapons) – Bioengineering - Biological Computer, Computational methods of phylogenetic and Molecular evolutionary analysis

Program: M.Sc. Zoology				
Lab Course – I		Course Code: 20PZO1P01		Course Title: Biology of Invertebrate and Vertebrates Cell and Molecular Biology and Biochemistry
Semester I	Hours/Week 4	Total Hours 60	Credits 5	Total Marks 100

Course Objectives

1. To observe various Invertebrate specimens by using Microscope.
2. To impart the practical knowledge on haematological studies
3. To understand the working principles and applications.
4. To learn how to quantify the biochemical substances and heritable traits.
5. To know the role of fauna in and around our ecosystem.

Invertebrates and Chordates

1. Structure and function of Major Mammalian Organs (Rat-heart, Pancreas, Liver, Kidney and Gonads) – Voucher Specimen
2. Spotters and Slides (For *Plasmodium sp.*- *Paramecium sp.*- Sponges- Hydra- Liver fluke- Tape worm and Peripatus.)

Cell and Molecular Biology

1. Micrometry for cell measurement
2. Identification of different types of cells in blood
3. Observation of Mitosis (onion root tip) and Meiosis (Grasshopper – Voucher Specimen)
4. Assessment of Cell division at various soil pH

Biochemistry

1. Qualitative analysis of Carbohydrate-Protein and Lipids
2. Estimation of glucose level in blood

3. Effect of Temperature on salivary amylase activity
4. Identification of amino acids by paper chromatography

Reference Books

1. Plumer H.T (2012) Practical: Biochemistry, Wiley Publication, India.
2. Borah D (2012) Biotechnology Lab Practices, Global Academic Publisher, India.
3. Kannan S, Krishnan M, Thirumurugan R and Achiraman S (2012) Methods in Molecular Biology, UVN Publishers, India.
4. Lal S.S (2009) Practical Zoology, Rastogi Publications, New Delhi.

Course Outcomes (COs)

On successful completion of the course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Understand and study the section of certain animals from Coelenterata, Aschelminthes and Annelida to understand the evolution of different types of coelom.	K2
CO2	Evalute of prepared slides of mouth parts of Honey bee, Housefly, Thrips, Mosquito, Bed bug and Butterfly to relate structure and type	K5
CO3	Study of the following specimens: Amphioxus, Balanoglossus, Ascidian, Peteromyzon, Ichthyophis, Draco, Pigeon and Bat.	K6

K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze, K5 – Evaluate, K6 – Create

Program: M.Sc. Zoology				
Core – V		Course Code: 20PZO2C05		Course Title: Animal Physiology and Endocrinology
Semester II	Hours/Week 6	Total Hours 90	Credits 4	Total Marks 100

Course objectives

1. To get knowledge about the structure and functions of various systems.
2. To understand the physiology of digestion, respiration, circulation and muscle fiber.
3. To study the structure and functions of endocrine glands.
4. To gain basic understanding about endocrinology.

UNIT – I

Nutrition and Digestion Metabolism: Types – Anabolism and Catabolism. Basal metabolic rate (BMR); Nutritive Requirements – Carbohydrates – Proteins - Lipids Vitamins and Minerals; **Physiology of Digestion:** Role of salivary glands - Liver Pancreas and Intestinal glands in digestion. Symbiotic digestion – Cellulose digestion. Absorption and Assimilation – Hormonal control of digestion.

UNIT – II

Respiration and Circulation

Respiration: Respiratory system of man – O₂ and CO₂ transport in the blood of human – Types, Haemoglobin – structure and function – Respiratory pigments in animals. Chemical regulation of respiration. **Circulation:** Blood – Composition of blood structure of human heart working mechanism of heart-peace maker and Conduction of heart beat – Blood coagulation. Lymph: composition, Dynamics and Haemostasis.

UNIT – III

Excretion, Osmoregulation and Thermoregulation Excretion: Types of Excretion: Structure of mammalian kidney – Urine formation and Role of hormones in excretion.

Osmoregulation: Osmotic and ionic regulation in freshwater and Marine fishes – osmoregulation in terrestrial animals. **Thermoregulation:** Thermoregulation in homeotherms and Poikilotherms. Comfort zone- body temperature – Physical, chemical, neural regulation and Acclimatization.

UNIT – IV

Muscle and Nerve Co-ordination Muscles: Types of muscles – Chemistry of muscles – Ultra structure of skeletal muscles. Mechanism of muscle contraction. **Nervous system:** Types of nervous system – Structure of Neuron – Types of Neuron conduction and transmission nerves impulses – Reflex action and Synapses action. **Receptor:** Structure and physiology of photoreceptor (Human eye) and Phonoreceptor (Human Ear).

UNIT – V

Endocrinology and reproduction Arthropod endocrines: Role of hormones in growth and Metamorphosis of Insects and Prawn. **Reproductive system:** Structure of Human reproductive organs – Sexual cycle in mammals - Hormonal role in ovulation and Birth control. **Endocrine glands:** Chemical structure and function hormones hypothalamus -Pituitary- Thyroid - Pancreas adrenal – Testes Ovary and Placenta. Hormones – Functions of hormone.

Course Outcomes (COs)

On successful completion of the course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Know the importance of nutrients and digestion.	K1
CO2	Understand the physiology of respiration, circulation and muscle.	K2
CO3	Impart knowledge on the role of renal organs in excretion.	K3
CO4	Describe the endocrine glands and their secretions.	K4
CO5	Evaluate the basic control processes of the nervous systems and explain how this drives muscle movement and sensory perception associated endocrine system.	K5

K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze, K5 – Evaluate, K6 – Create

Program: M.Sc. Zoology				
Core – VI		Course Code: 20PZO2C06		Course Title: Molecular Genetics
Semester II	Hours/Week 6	Total Hours 90	Credits 4	Total Marks 100

Course objectives

1. To get knowledge about the components of genetic material.
2. To know about genome and their role in inheritance.
3. To understand the relation between genes and diseases.

UNIT – I

Introduction to principles of Genetics: Dominant and Recessive Epitasis Multiples factor inheritance – Skin colour in Man. Co-dominance – Pleotropism – Lethal genes in Man and Mice.

UNIT – II

ABO and Rh type of Blood groups – Erythroblastosis foetalis - Haemophilia - Linkage and crossing over and Mapping of chromosome - Non-disjunction-Free Martin- Sex linked inheritance in Drosophilae and Man - Y-linked inheritance – Barr body- Extra chromosomal inheritance – Kappa particles – Coiling in Snail – Mirablis and Episome.

UNIT – III

Mutation – Types (lethal, conditional and biochemical) causes and Detection – Loss of function- Gain of function-Germinal verses somatic mutants- Insertional mutagenesis – Inborn errors of metabolism Sickle cell anemia and Phenylketonuria.

Chromosomal Abreaction: Molecular basis of mutation – Polygenic inheritance – Crossing over – Mutation and Mutagenesis; Transition and Transversion – Spontaneous and Induced mutations- Single Nucleotide polymorphism and Genetic disorders.

**UNIT – IV**

Heredity and variation Linkage maps- Tetrad analysis-Mapping with molecular markers- Mapping by using somatic cell hybrids - Lod score for linkage testing-Karyotyping- Pedigree analysis. Heritability and its measurements- QTL mapping.

UNIT – V

Viral oncogenes- Activation of proto-oncogenes- Tumor suppressor genes- Regulation of gene expression by oncoproteins- Signal transduction by oncoproteins- Cell cycle check points and Cell line.

Course Outcomes (COs)

On successful completion of the course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Get knowledge about the structure, organization and functions of genetic materials.	K1
CO2	Understand the expression, regulation and mutation of gene.	K2
CO3	Apply the knowledge on the role of genes in heritability and its measurements.	K3
CO4	Analyze the importance of viral oncogenes, regulation of gene expression and signal transduction by oncoproteins.	K4

K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze, K5 – Evaluate, K6 – Create

Program: M.Sc. Zoology				
EDC-I		Course Code: 20PZO2EDC01		Course Title: Wild Life Management
Semester	Hours/Week	Total Hours	Credits	Total Marks
II	4	60	4	100

Course Objectives

1. To know the wild life – Tourism foreign exchange. Important wildlife sanctuaries of the world.
2. To know the wild life in India such as wild life resources and sanctuaries.
3. To know the behavior of grazers (Elephants) carnivores (Lion) and primates (Orange, chimps and Gorillas).
4. To study the behavior and migration of Birds – various Bird sanctuaries Bird watching, fishing etc..

UNIT – I

Wild Life: Introduction Scope for the study of wildlife resources and forestry. Wild life Tourism. Foreign exchange and Revenue from Wildlife Tourism – Employment prospects. Important wildlife sanctuaries of the world. Need for the production and Conservation and conservation of wildlife and endangered species- Red data book.

UNIT – II

Wild Life In India: Important wildlife game reserves and sanctuaries in India, Gir Lion forest, Jim Carbett Tiger reserve- Kasiranga Sanctuary- Point Calimere - Bharatpur Kaleodeo bird sanctuaries - Rann of Kutch - Mudumalai- Karkudi and Wynad sanctuaries and their wildlife species and Endangered species.

UNIT – III

Ethology of Animal Behaviour: Grazers – Elephant – herds, their behaviour, family hierarchy, feeding, reproduction, and Migration, Carnivores –Lions –family life, hunting behavior and Feeding, mating and Reproduction, hierarchy, Primates – Larger primates – Orange, Chimps and Gorillas and Group behavior.

UNIT – IV

Bird Watching as hobby – Equipment needed for Bird watching, - Important migratory birds of India, check list of birds, Migratory behavior and Influencing factors. Fishing and sport / game fishes. Point Calimere- Vedanthagal – Muthupert - Bharatpur and other bird sanctuaries.

UNIT – V

Wildlife watching and tours as hobby and research. Wildlife filming. Videography and documentation. Silent Valley Project, Wildlife parks. Zoos, Treatment of animals in captivity and circuses. Wildlife conservation measures – Wildlife Protection Acts and Laws, World Wildlife conservation and funding agencies and programmes (WWF). Tiger projects (UNEP), ICUN (International Union for conservation of Nature and Natural Productively).

Course Outcomes (COs)

On successful completion of the course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Describe the wildlife management in India and National Parks and Sanctuaries.	K2
CO2	Analyze the Biodiversity hot spots, Endangered species and their Protection	K4
CO3	Evaluate the Wild life management Techniques and animal plant interaction.	K6

K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze, K5 – Evaluate, K6 – Create

Program: M.Sc. Zoology				
EDC-I		Course Code: 20PZO2EDC02		Course Title: Vermitechnology
Semester	Hours/Week	Total Hours	Credits	Total Marks
II	4	60	4	100

Course Objectives

1. To impart training on Earthworm culture technology.
2. To create knowledge on Self - Employment opportunity.

UNIT – I

Scope and importance of Vermitechnology: Classification of earthworm. Earthworm – External features, Digestive system, excretory system, reproductive system and Life cycle- Economic importance of Earthworm.

UNIT – II

Vermiculture: Methods of collection of earthworms. Steps involved in vermiculture. Factors influencing the culture of earthworms. Vermicomposting; steps of vermicomposting mechanism of vermicomposting and Changes in during vermicomposting.

UNIT – III

Methods of vermicomposting: Small scale or Indoor vermicomposting – Pit method. Heap method. Large scale or outdoor vermicomposting – Bed method, Window method vermitech 200. Vermiwash – preparation, composition and Application of vermiwash.

UNIT – IV

Vermicompost: Physical, chemical and biological characteristics of vermicompost. Nutritive value of vermicompost advantages and Economic importance of vermicompost. Use of vermicompost for crop production. Use of vermicompost in Land improvement and Reclamation.

**UNIT – V**

Role of earthworm in waste management: Solid waste management, Sewage waste management (Vermifilter), Faecal waste management, Industrial waste management. Role of earthworm in soil fertility earthworm as Farmer's friend.

Reference Books

4. Satchel J. E (1983). Earthworm Ecology, Chapman Hall, London.

Course Outcomes (COs)

On successful completion of the course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Knowledge about sustainable agriculture, organic farming and waste management using vermitechnology.	K1
CO2	Understand the Earthworm- types, classification, organization and lifecycle.	K2
CO3	Apply the rearing and harvesting techniques in sericulture.	K3
CO4	Analyse the all aspects related to Vermicomposting and the economics of Vermiculture	K4

K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze, K5 – Evaluate, K6 – Create

Elective – II		Course Code: 20PZO2E04		Course Title: Cancer and Stem Cell Biology
Semester	Hours/Week	Total Hours	Credits	Total Marks
II	5	75	3	100

Course Objectives

1. To motivate students to learn the fundamentals of cancer
2. To enable the students to know how the stem cells are functioning
3. To get knowledge about different types of molecular techniques.

UNIT – I

Regulation of the Eukaryotic cell cycle- Cancer biomarkers - Primary and established cell lines, Kinetics of Cancer cell growth- Genetics of cancer biology. Cancer stem cell culture and their applications. Cell culture-based vaccines and Cancer proteomics at a glance

UNIT – II

Cell Signaling in Cancer Cells and Signaling at the cell surface level- Types of signaling pathways that control gene activity in normal and cancer cells - Endocytotic and Exocytotic proteins in membranes and Organelles - Vascular traffic - Metabolism and Movement of lipids.

UNIT – III

Etiology- Epidemiology Diagnosis and Treatment of Breast, Lung, and Colo-rectal, cancers. Current scenario of micro-RNA technology in cancer medicine. Role of DNA vaccination in cancer treatment.

UNIT – IV

Introduction to Stem cells– Stem cell definition, origin and Hierarchy; stem cell properties, Identification and Characterization- Potency and Differentiation; niche of stem cell; overview of different stem cell types (Embryonic stem cell, Adult stem cell and Induced pluripotent stem cells)

UNIT – V

Characterization and properties of ES cells -Pluripotency and self-renewal of ES; molecular mechanisms regulating pluripotency Mesenchymal stem cell (MSC), Haematopoietic stem cell (HSC) pluripotent stem cell (iPSC), Gene therapy – Therapeutic cloning. Ethical and Social consideration of Stem cell research.

Course Outcomes (COs)

On successful completion of the course, the students will be able to

CO Number	CO Statement	Knowledge Level
CO1	Understand key theoretical aspects of the regulation of cellular signalling, proliferation and differentiation in the context of embryonic development, stem cells and diseases such as cancer.	K1
CO2	This course work provides chance to work in stem cells and cancer stem cells.	K2

K1 – Remember, K2 – Understand, K3 – Apply, K4 – Analyze, K5 – Evaluate, K6 – Create

Mapping of COS with POs

Program: M.Sc. Zoology				
Elective – II		Course Code: 20PZO2E05		Course Title: Microbiology
Semester	Hours/Week	Total Hours	Credits	Total Marks
II	5	75	3	100

Course Objectives

1. To provide students with the latest information in microbiological methods.
2. To provide advanced knowledge, understanding, and critical judgment about the profession in microbiology.
3. To update basic knowledge on microorganisms.
4. To understand the economic importance of microbes in relation to agriculture, industry and medicine.

UNIT-I

History and Scope of Microbiology: Wittaker's Five Kingdom concept - General features of prokaryotes. Morphology and Ultra-structure of viruses. Mycology: Classification of bio medically important fungal species.

UNIT-II

Culture and Characterization: Isolation and identification of bacteria. Techniques of pure culture methods. Phases of growth. Methods of sterilization and Disinfection –. Staining: Simple and Differential staining-Gram staining- Acid fast staining Endospore staining- Capsule staining and Flagella staining.

UNIT-III

Microbial genetics: Methods of genetic transfers – transformation, conjugation, transduction. Microbial Genomics: Genome project of Escherichia coli and Yeast. Metagenomics concepts and Significance. Microbial control – Physical and chemical agents

UNIT-IV

Host parasite interaction: Principles of Disease and Epidemiology –Microbial Mechanisms of Pathogenicity Innate Immunity: Nonspecific Defenses of the Host Adaptive Immunity: Specific Defenses of the Host

UNIT-V

Industrial Microbiology: Microbial fermentation Microbial production of Antibiotics: Penicillin-Streptomycin - Vaccines - Genetic recombinant vaccines. Bioremediation Principles and Applications.

Program: M.Sc. Zoology

Elective – II		Course Code: 20PZO2E06		Course Title: Biotechnology	
Semester II	Hours/Week 5	Total Hours 75	Credits 3	Total Marks 100	

Course Objectives

1. To understand the basic knowledge of Nano-Biotechnology.
2. To enhance the synthesis and application of Nano-materials in medicine and agriculture.
3. To apply Nano-Technological knowledge on the DNA, Proteins, Nucleic acids, drug delivery and biomedicine.

UNIT-I

Concepts and scope of Biotechnology – Gene cloning the basic steps – various types of restriction enzymes – Ligase – linkers and Adapters – cDNA – Transformation – Selection of recombinants. Gene probe – Molecular finger printing (DNA finger printing) – RFLP –PCR techniques – Genomic library.

UNIT-II

Plasmid biology – Cloning vector based on *E. coli*-PBR322 and Bacteriophage. Cloning vector for yeast. Cloning vector for Agro Bacterium Tumefaciens. Cloning vector for mammalian cells – Simian virus 40 – Gene transfer technologies.

UNIT-III

Cell culture – Organ culture – Whole embryo culture- Embryo transfer – *In vitro* fertilization (IVF) technology – Dolly – Embryo transfer in human. Transgenic animal. Human gene therapy and Cryobiology

UNIT-IV

Bioinformatics: Basic concepts of Bioinformatics - Sequence Databases - Sequence formats – Gene basic - Networking – Network access- Internet, E.mail servers – Use of databases biology - Sequence databases - Sequence Analysis – Protein and Nucleic acids- Structural

comparisons

UNIT-V

Nanotechnology: Basic principles and scope of Nanotechnology – Structural and Brownian assembly – Important characteristics – Molecular manufacturing – Decisive military capabilities – Molecular mills in the fields of agriculture – Medicine - Future perspectives of Nanotechnology in Life Sciences and Applications of Nanotechnology.

Lab Course – II		Course Code: 20PZO2P02		Course Title: Animal Physiology and Endocrinology and Molecular Genetics
Semester II	Hours/Week 5	Total Hours 60	Credits 5	Total Marks 100

Course Objectives

1. To determine the physiological action in relation to temperature, PH and osmotic pressure.
2. To acquire the practical knowledge about primary metabolites and its estimation in higher organisms.
3. To inculcate knowledge on aquaculture.

Animal Physiology and Endocrinology

1. Salt loss and salt gain in a fresh water fish.
2. Preparation of Haemin crystal in human blood.
3. Estimation of O₂ consumption of fresh water fish.

Human Molecular Genetics

1. ABO Blood group in human
2. Study of Polytene chromosome in the Drosophila larva

Spotters

Ciliated epithelium - Cardiac muscle T.S-Bone tissue T.S -Simple squamous Epithelium- Nervous tissue. Transverse section of Pituitary - Thyroid- Pancreas - Adrenal- Thymus-Ovary and Testis
